Grade equivalent scores are given as a decimal with the grade level year preceding the decimal point and month into that grade following the decimal point. For example, a grade equivalency score of 8.2 means that the student tested at 8th grade and two months into the 8th grade. issues are covered such as the insanity defense and the death penalty as well as the more recent three strikes and you're out movement and mandatory minimums This series will be of great utility to students scholars and others with interests in the literature of criminal justice and criminology
