

Bellringer 1/19: Tides and Ocean Motions

Waves and surface currents are caused by **wind**. The size of the wave depends on the **time** (duration) the wind blows across the water (3 days bigger than 3 hours), the **distance** (3,000 miles bigger than 300 miles) and the strength or **speed** the wind blows (30 mph wind bigger than 3 mph).

The daily rise and fall of ocean water and the interaction between the Sun, Moon, and Earth causes **tides**. Each day, Earth experience two **low** tides and **two** high tides.

When the Sun, Earth, and Moon are aligned, there are exceptionally strong gravitational forces, causing very high and very low tides, which are called **spring** tides. During spring tides a **full** and **new** moon phase occurs.
