Introduction

Michel Montaigne (1533-1592) is credited with inventing the essay form with his classic work *Essais* (1st Edition, 1580). He lived and reworked his essays in a French rural retreat after being the Mayor of Bordeaux from 1581-1585. Since then, essays have traditionally been short statements feeling their way towards expression of what needs a far wider space to exhaust. Using the Montaigne essay style here, I have not provided specific references for statements throughout this article. Every human being has a personal life philosophy. It was formed by a complex lifetime mix of genetics, environment, and learning over time. A small percentage of humans have explicitly documented their own philosophy as an analysis of their own value systems, or to understand the values, sources, and influences on their beliefs over time. My definition of *values* – created during my doctoral studies at UCLA – is “Values are principles or things preferred.” That is different from the economic definition of value, which is usually oriented toward quantitative worth. Philosophy and values are not synonymous, but have many commonalities. Philosophy is oriented toward total life meaning, while values form the components of that totality.

Most people’s personal philosophy is created and evolves from experiences and just living, not from conscious reflection and design. Is that not the best way to develop philosophy? For some, it may be. But the belief I bring to this article is that individual, family, group, organization, agency, business, society, national, international, and human existence would improve with wiser and more explicit self-examination of values and philosophy. There is value in knowing answers to the questions: *What do I believe?* and *How should my beliefs impact my behavior?*

Dr. Paul R. Cone was my mentor for two university faculty appointments – the University of Southern California in 1975 and La Sierra University, Riverside, California in 1992. Paul was a wise, compassionate, and brilliant leader in both academics and business. One of the many lessons I learned from Paul Cone he had condensed into
