Enforcing Freedom Kerwin Kaye,2019-12-17 In 1989 the first drug treatment court was established in Florida inaugurating an era of state supervised rehabilitation Such courts have frequently been seen as a humane alternative to

incarceration and the war on drugs *Enforcing Freedom* offers an ethnographic account of drug courts and mandatory treatment centers as a system of coercion demonstrating how the state uses notions of rehabilitation as a means of social regulation. Situating drug courts in a long line of state projects of race and class control, Kerwin Kaye details the ways in which the violence of the state is framed as beneficial for those subjected to it. He explores how courts decide whether to release or incarcerate participants using nominally colorblind criteria that draw on racialized imagery. Rehabilitation is defined as preparation for low wage labor and the destruction of community ties with bad influences, a process that turns participants against one another. At the same time, Kaye points toward the complex ways in which participants negotiate state control in relation to other forms of constraint in their lives, sometimes embracing the state's salutary violence as a means of countering their impoverishment. Simultaneously sensitive to ethnographic detail and theoretical implications, *Enforcing Freedom* offers a critical perspective on the punitive side of criminal justice reform and points toward alternative paths forward.

Tandon's Textbook of Cardiology Dorairaj Prabhakaran, Raman Krishna Kumar, Nitish Naik, 2019-01-17 An authoritative, comprehensive and accessible cardiology textbook that caters to the needs of trainees and practicing cardiologists. Cardiovascular disease is now the largest contributor to global mortality. Low and middle income countries (LMICs) presently bear the brunt of this global epidemic, accounting for over three quarters of cardiovascular deaths and 90% of these deaths under 70 years of age. The experience and expertise of health professionals in these countries will therefore be the principal determinant of global success in countering and curbing the global cardiovascular epidemic in the coming decades. This book covers the fundamentals of cardiology in depth to provide conceptual clarity and delves into specific cardiovascular disorders with detailed descriptions that range from aetiology and pathophysiology to evidence-informed approaches to diagnosis and management. It does all of this by blending contextual relevance with uncompromising academic rigor.

Agency and Participation in Childhood and Youth Caroline Sarojini Hart, Mario Biggeri, Bernhard Babic, 2014-02-27 *Agency and Participation in Childhood and Youth* presents new critical engagement in conceptualising the roles of youth agency and participation in education, development and the pursuit of social justice. Theoretically, the book is framed within the paradigm of the capability approach initially developed by Nobel Laureate Amartya Sen and further differentiated by others including philosopher Martha Nussbaum. The book unravels the complex relationships between the nature of youth agency and participation in education but also in wider political, economic and social arenas and the potential of young people to expand their freedoms to lead lives they have reason to value. It is thus argued that ethical, sustainable development is contingent on the nature of youth agency and participation in schooling and further afield. Bringing together leading international experts researching children's capabilities, *Agency and Participation in Childhood and Youth* offers a unique exploration of links between exciting new areas of development in theory, research and practical applications of Sen and Nussbaum's ideas. The book addresses a significant gap in the literature, drawing on empirical data from the UK, the USA

Jordan Palestine the Democratic Republic of the Congo Switzerland New Zealand and beyond with perspectives presented from both within and outside schools and other formal educational settings Agency and Participation in Childhood and Youth is of particular interest to academics teaching professionals undergraduate and postgraduate students of education studies social policy youth and development studies
