## **Don't Touch That Button!**

(1) "Five more minutes" is the first thought of people all over the country when their alarms go off in the morning. (2) This first thought is usually followed by hitting the snooze button and falling back asleep for those precious few extra moments. (12) People normally fall asleep at night and wake up in the morning because their internal rhythms are operating naturally. (13) Circadian rhythms are negatively impacted by repeated use of the snooze button, which can contribute to feelings of sleepiness during the day and an inability to fall asleep at night. (14) Once that happens, the snooze button becomes even more attractive in the morning.

(15) Rather than relying on the snooze button, people need to consider developing different routines. (16) The easiest option for those who still cannot resist the snooze button is to put the alarm on the other side of the room. (17) Having to get out of bed to turn it off changes the likelihood of hitting the snooze button. (18) Another option, if your schedule allows it, is to just reset the
