Educational Measurement Robert L. Brennan, 2023-10-03 Educational

Measurement has been the bible in its field since the first edition was published by ACE in 1951. The importance of this fourth edition of Educational Measurement is to extensively update and extend the topics treated in the previous three editions. As such, the fourth edition documents progress in the field and provides critical guidance to the efforts of new generations of researchers and practitioners. Edited by Robert Brennan and jointly sponsored by the American Council on Education (ACE) and the National Council on Measurement in Education, the fourth edition provides in-depth treatments of critical measurement topics, and the chapter authors are acknowledged experts in their respective fields. Educational measurement researchers and practitioners will find this text essential, and those interested in statistics, psychology, business, and economics should also find this work to be of very strong interest. Topics covered are divided into three subject areas: theory and general principles; construction, administration, and scoring; and applications. The first part of the book covers the topics of validation, reliability, item response theory, scaling, and norming; linking and equating; test fairness; and cognitive psychology. Part two includes chapters on test development, test administration, performance assessment, setting performance standards, and technology in testing. The final section includes chapters on second language testing, testing for accountability in K-12 schools, standardized assessment of individual achievement in K-12 schools, higher education admissions testing, monitoring educational progress, licensure and certification testing, and legal and ethical issues. *Proceedings of the Section on Statistical Education*, American Statistical Association, Section on Statistical Education, 1998. **Statistics Alive!** Wendy J. Steinberg, 2010-07-21. Based on years of first-hand teaching experience, Wendy J. Steinberg has created *Statistics Alive!*, the most user-friendly statistics text for students in the social and behavioral sciences, now in its Second Edition. This textbook includes topics such as frequency distributions, hypothesis formation, and inferential statistics, and bivariate regression. Effect size and power, often shortchanged in other textbooks, each get substantive treatment. Students are well prepared for a next course in statistics. Key Features: Modular treatment allows students to master prescribed chunks of information. Strong pedagogy throughout includes learning objectives, key terms, and Check Yourself questions. New to the Second Edition: Twice as many chapter exercises. Final module on multiple regression and the General Linear Model. SPSS point-and-click instructions and screen shots of the output for all in-text examples. Descriptive dispersion solutions shown using both N and $n-1$ denominators to accommodate any instructor's preference.
