Neotropical Savannas and Seasonally Dry Forests R. Toby Pennington, James A. Ratter, 2006-05-25 More often than not when people think of a neotropical forest what comes to mind is a rain forest rather than a dry forest Just as typically when they imagine a savanna they visualize the African plains rather than those dry woodlands and grasslands found in the Neotropics These same preconceptions can be found among scientists as these ne

The International Handbook of Creativity James C. Kaufman, Robert J. Sternberg, 2006-04-03 What constitutes a creative person Is it someone who can perform many tasks innovatively Is it someone who exhibits creative genius in one area Is it someone who utilizes her creativity for good and moral causes Is it someone who uses his creativity to help his company or country succeed Different cultures have different perspectives on what it means to be creative yet it is nearly always the American or Western perspective that is represented in the psychological literature The goal of The International Handbook of Creativity is to present a truly international and diverse set of perspectives on the psychology of human creativity Distinguished scholars from around the world have written chapters for this book about the history and current state of creativity research and theory in their respective parts of the world The 2006 book presents a wide array of international perspectives and research

The Praeger Handbook of Personality across Cultures A. Timothy Church Ph.D., 2017-07-14 This important multivolume work sheds light on current and future research on cultural universals and differences in personality in their evolutionary ecological and cultural contexts How does culture impact personality traits To answer that question the three volumes in this set address current theory and research on culture and personality in an effort to determine how people differ and how they are alike Detailed chapters by

scholars from around the world unveil a fascinating picture of the relationship between culture and important aspects of personality. They also address the accuracy or meaningfulness of trait comparisons across cultures and the methods and limitations of research on the subject. As most psychological research is conducted on participants from Western industrialized countries, a work that includes a wide range of cultures not only fosters a more complete understanding of human personality but also broadens perspectives on value systems and ways to live. Each of the three volumes concentrates on distinct areas of research, exposing the reader to the diverse theoretical and empirical approaches and topics in the field. Volume 1 focuses on the cross-cultural study of personality dispositions or traits. Volume 2 examines the relationship between culture and other important aspects of personality, including the self, emotions, motives, values, beliefs, and life narratives, as well as aspects of personality and adjustment associated with biculturalism and intercultural competence. Volume 3 looks at evolutionary, genetic, and neuroscience perspectives on personality across cultures, along with ecological and cultural influences. In addition to providing readers with a thorough analysis of current and future directions for research, this unrivaled work brings together multiple perspectives on personality across cultures, thereby promoting a more integrative understanding of this important topic.

**Portugal SB07. Sustainable Construction, Materials and Practices** Luis Bragança, Manuel D. Pinheiro, Said Jalali, Ricardo Mateus, Rogério Amoêda, Manuel Correia Guedes, 2007-08-15

The construction industry is a vibrant and active industry. The building sector is responsible for creating, modifying, and improving the living environment of humanity. On the other hand, construction and buildings have considerable environmental impacts, consuming a significant proportion of limited resources of the planet, including energy, raw material, water, and land. Therefore, the sustainability of the built environment, the construction industry, and the related activities is a pressing issue facing all stakeholders. In order to promote Sustainable Development, the new millennium is challenging practitioners and researchers with the sustainability of the built environment and the construction industry. Hence, the main purpose of this publication is to discuss these challenges and present solutions that actively facilitate and promote the adoption of policies, methods, and tools to accelerate the movement towards a global sustainable built environment. The issues presented include: Building sustainability assessment tools, Indoor environment quality and benchmarks, Sustainable resources and materials use, Use of non-conventional materials, Use of industrial waste, Eco materials and technologies, Sustainable management of existing building stock, Innovative sustainable construction systems, and Design.
