Recognition And The Media:

Recognition and the Media R. Maia, 2014-10-29 This collection examines Axel Honneth's theory of recognition and the crucial role played by the media in struggles for recognition. It brings together debates on controversial aspects of Honneth's work and a set of intriguing empirical studies including with slum dwelling adolescents, leprosy patients and women exposed to child labor exploitation. *Media, Society, World* Nick Couldry, 2013-08-29 Media are fundamental to our sense of living in a social world. Since the beginning of modernity, media have transformed the scale on which we act as social beings. And now in the era of digital media, media themselves are being transformed as platforms; content and producers multiply. Yet the implications of social theory for understanding media and of media for rethinking social theory have been neglected. Never before has it been more important to understand those implications. This book takes on this challenge. Drawing on Couldry's fifteen years of work on media and social theory, this book explores how questions of power and ritual capital and social order and the conduct of political struggle, professional competition and everyday life are all transformed by today's complex combinations of traditional and new media. In the concluding chapters, Couldry develops a framework for global comparative research into media and for thinking collectively about the ethics and justice of our lives with media. The result is a book that is both a major intervention in the field and required reading for all students of media and sociology. *Recognition in the Age of Social Media* Bruno Campanella, 2023-10-30 The desire to be recognized is a basic human trait. In contemporary society, social media platforms play a key role in defining how processes of recognition take shape. To post, to like, or to comment have become daily practices of expressing individual recognition. On the one hand, social media platforms make it easier for individuals to be visible and to be recognized; on the other hand, they control the structure of these dynamics. This timely and original book reflects on processes of recognition on social media platforms. Revisiting traditional discussions on recognition theory, Bruno Campanella investigates how the field of media and communication has used the concept and poses new questions raised by the omnipresence of social media. He argues that existing work does not fully explore the impact of platforms on contemporary processes of recognition. Individuals must learn new skills to make themselves visible online, but how to achieve this changes as a consequence of the role played by platforms: what is seen depends on decisions taken by their algorithms, which impacts how individuals and social groups are valued in society. *Recognition in the Age of Social Media* is a key contribution to the field and a must-read for students and scholars of media and communication, sociology and politics. **Media Freedom Under the Human Rights Act** Helen Fenwick, Gavin Phillipson, 2006 Media Freedom under the Human Rights Act provides the most comprehensive analysis to date of the impact of Article 10 ECHR as received through the Human Rights Act 1998 on the substantive law governing freedom of expression in the media. Fully up to date, the book provides extensive coverage of crucial recent developments in this field: these include the key cases of *Ashworth* and *Punch* in the area of contempt; the ground-breaking privacy decisions in *Von Hannover v Germany* and *Campbell v MGN*; full

consideration of theoretical approaches to explicit speech and blasphemy including a detailed critique of Strasbourg case law in the area detailed discussion of the new offence of incitement to religious hatred the new scheme for content regulation of broadcasting under the Communications Act 2003 in the light of Prolife Alliance a full survey of recent domestic and Strasbourg caselaw in the areas of copyright and political defamation and analysis of the early impact of the Freedom of Information Act The authors both leading academics in the field have drawn on significant comparative decisions to formulate a coherent and provocative critique of the relationship between media law and freedom of expression and suggested principles which make a significant contribution to the legal discourse surrounding media freedom in the Human Rights Act era The result is a book which provides a scholarly and theoretically informed analysis of this very topical subject of interest to those studying at all levels and practising in this area of law
