Cultivating Commons Philip C. Brown,2011-03-31 Cultivating Commons challenges the common understanding of Japanese economic and social history by uncovering diverse landholding practices in early modern Japan In this first extended treatment of multiple systems of farmland ownership Philip Brown argues that it was joint landownership of arable land not virtually private landownership that characterized a few large areas of Japan in the early modern period and even survived in some places down to the late twentieth century The practice adapted to changing political and economic circumstances and was compatible with increasing farm involvement in the market Brown shows that land rights were the product of villages and to some degree daimyo policies and not the outcome of hegemony and shoguns cadastral surveys Joint ownership exhibited none of the tragedy of the commons predicted by much social science theory and in fact explicitly structured a number of practices compatible with longer term investment in and maintenance of arable land Exploring early modern society from the ground up this work provides new perspectives on how villagers organized themselves and their lands and how their practices were articulated or were not articulated to higher

layers of administration It employs an unusually wide array of sources and methodologies In addition to manuscripts from local archives it exploits interviews with modern informants who used joint ownership and a combination of modern geographical tools hazard maps soil maps digital elevation models geographic information systems technologies to investigate the degree to which the most common form of joint ownership reflected efforts to ameliorate flood and landslide hazard risk as well as microclimate variation Further it explores the nature of Japanese agricultural practice its demand on natural resources and the role of broader environmental factors all of which infuse the study with new environmental perspectives and approaches Cultivating Commons will be welcomed by Japanese historians those in other regional national fields and social scientists concerned with issues of resource management economic development and rural society Pure Lands in Asian Texts and Contexts Georgios T. Halkias, Richard K. Payne, 2019-03-31 This diverse anthology of original Buddhist texts in translation provides a historical and conceptual framework that will transform contemporary scholarship on Pure Land Buddhism and instigate its recognition as an essential field of Buddhist studies Traditional and contemporary primary sources carefully selected from Buddhist cultures across historical geopolitical and literary boundaries are organized by genre rather than chronologically geographically or by religious lineage a novel juxtaposition that reveals their wider importance in fresh contexts Together these fundamental texts from different Asian traditions expertly translated by eminent and up and coming scholars illustrate that the Buddhism of pure lands is not just an East Asian cult or a marginal type of Buddhism but a pan Asian and deeply entrenched religious phenomenon The volume is organized into six parts Ritual Practices Contemplative Visualizations Doctrinal Expositions Life Writing and Poetry Ethical and Aesthetic Explications and Worlds beyond Sukh vat Each part is introduced and summarized and each translated piece is prefaced by its translator to supply historical and sectarian context as well as insight into the significance of the work Common and less common issues of practice doctrine and intra religious transfer are explored and deeper understandings of the meaning of pure lands are gained through the study of the celestial cosmological internal and earthly pure lands associated with various buddhas bodhisattvas and devotional figures The introduction by the volume editors ties the diverse themes of the book together and provides a historical background to Pure Land Buddhist studies Scholars of Buddhism and Asian religion including graduate and post graduate students as well as Buddhist practitioners will appreciate the range of translated materials and accompanied discussions made accessible in one essential collection the first of its kind to center on the formerly neglected topic of Buddhist pure lands The Warsaw Voice ... Business and Economy Yearbook ,1998 **Catalogues** L. W. Schmidt, 1871 **Dogen's Manuals of Zen Meditation** Carl Bielefeldt, 1990-08-16 Zen Buddhism is perhaps best known for its emphasis on meditation and probably no figure in the history of Zen is more closely associated with meditation practice than the thirteenth century Japanese master Dogen founder of the Soto school This study examines the historical and religious character of the practice as it is described in Dogen s own meditation texts introducing new materials and

original perspectives on one of the most influential spiritual traditions of East Asian civilization The Soto version of Zen meditation is known as just sitting a practice in which through the cultivation of the subtle state of nonthinking the meditator is said to be brought into perfect accord with the higher consciousness of the Buddha mind inherent in all beings This study examines the historical and religious character of the practice as it is described in Dogen s own meditation texts introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization
