

Sample Essay on Ethics

Ethics is defined as the comprehension of what is right and what is wrong within the moral context and different cultures and communities have a different perception of right and wrong depending on their individual regulations, religious beliefs, as well as cultural practices. Regardless of the setting, ethics are usually formulated to ensure that individuals choose right over wrong when faced with different decisions. The business world has various codes of ethics that have been written to guide the professionals of different fields. Nevertheless, despite the existence of these codes, the ethical dilemmas are more often than not difficult to resolve. Utilitarianism, egoism, deontology, virtue ethics, and care ethics are some of the ethical theories that philosophy has cited in resolving ethical dilemmas. Such theories are designed with intention of preventing ethical violations which may pave way for the exploitation of those who are less powerful within the business world. Quotes from famous philosophers in the world are evidence and implications of the existence of such exploitation as rooted in history. Some of these quotes include '*Charity is no substitute for justice withheld*' by St. Augustine and '*The price good men pay for indifference to public affairs is to be ruled by evil men*' by Plato. This paper gives an in-depth analysis of the connection between different ethical aspects.

The quote '*Charity is no substitute for justice withheld*' by St. Augustine has raised a debate with regards to charity versus justice. Both charity and justice are very noble social aspects because they reflect the will and desire to help another individual. Charity, for instance, is the act of giving to the less fortunate in the society with the intention of improving their lives. On the other hand, justice entails enforcing fair conducts and distributing these equally to make sure that every person has a chance to lead a better life. St. Augustine asserts that the role of these two important social aspects differs and as such it is impossible

The Basics of Media Writing Scott A. Kuehn, Andrew Lingwall, CQ Press, CQ Press, 2016-12-08 *The Basics of Media Writing A Strategic Approach* helps readers develop the essential writing skills and professional habits needed to succeed in 21st century media careers This research driven strategy based media writing textbook digs deeply into how media professionals think and write in journalism public relations advertising and other forms of strategic communication Authors Scott A Kuehn and Andrew Lingwall have created two comprehensive writing models to help students overcome their problems in finding and developing story topics by giving them starting points to begin writing

The Professional Strategy Triangle model shows students how to think critically about the audience the situation and the message before starting a news story or persuasive piece and the FAJA four point model asks students a series of questions about their story type Fact Analysis Judgment or Action to guide them to the right angle or organizational structure for their message Rooted in classical rhetorical methods this step by step technique enables readers to strategically approach each writing task no matter the format *Fast Facts for Writing the DNP Project* Thomas L. Christenbery, 2020-09-10 Note to Readers Publisher does not guarantee quality or access to any included digital components if book is purchased through a third party seller Write an exceptional impactful DNP project paper This mentor in a book will help nursing students develop a high quality well organized DNP project paper by using the time tested proven IMRaD Introduction Methods Results and Discussion format the gold standard for scientific writing in health care Far beyond the simple outlines and rubrics usually offered to DNP students this book provides guidance on how to write a DNP Project that presents scholarly work in an effective way Written in concise Fast Facts format characterized by bulleted information and short paragraphs this book delivers clear step by step guidance to create each section of the DNP paper To provide a consistent example of a well crafted paper this guide follows a specific clinical topic throughout to clearly demonstrate the paper s development It also discusses the foundational knowledge needed prior to writing the paper and presents a step by step guide for aligning EBP and QI projects to each IMRaD component This guide offers key insights into what faculty will expect for each content section and presents talking points for student faculty discussions Literature appraisal tables and synthesis tables are presented in the literature review section along with detailed rationale for optimal use Key Features Serves as the only DNP resource to embrace the time tested IMRaD model Describes the necessary components of DNP Project presentation including dissemination Delivers clear step by step guidance to complete the DNP Project Book chapters progress through the development of a DNP paper Provides faculty tips so instructors can help students produce quality scholarly work

Writing Philosophy Papers Zachary Seech, 1997 Sound reasoning is the basis of good philosophy Writing Philosophy Papers is the only handbook that clearly and concisely introduces philosophy students to four basic kinds of papers thesis defense comparison and contrast research and summary commonly assigned in philosophy courses First published in 1993 Writing Philosophy Papers continues to help thousands of students learn the basics of philosophical logic and the elements of a well reasoned paper It contains specific instruction on planning selecting a topic doing research writing revising and presentation It also has a new chapter on informal logic that helps readers polish their persuasive writing skills Based on the author Zachary Seech s experience as a philosophy professor and writing instructor Writing Philosophy Papers addresses the basic questions most students have when faced with writing a philosophy paper such as how to handle documentation and how to use the school library In addition new material on accessing The Philosopher s Index and using computer based references makes Writing Philosophy Papers an indispensable desk reference for every philosophy student **Journal**

Article Writing and Publication Sharon A. Gutman, 2024-06-01 The ability to demonstrate that a specific health care profession provides valuable and effective services that meet society's health needs is a major objective for all health care academicians and researchers. Such skills are critical to ensure service reimbursement from an increasingly small pool of health care dollars. Demonstrating clinical effectiveness depends on the reporting of written research results through journal publication so that the health care community and larger society will be able to access and read evidence supporting health care services. Today several clinical reporting standard guidelines have been created by researchers to enhance the ability of readers to evaluate the quality and value of studies. *Journal Article Writing and Publication* is the first text to compile those clinical research reporting standards in one source and helps educators and novice researchers to better understand the skills needed for journal publication. Health care researchers must begin using these reporting standards in order to write manuscripts that are both correctly formatted and transparently convey all critical study strengths and limitations. Educators must teach these reporting standards to students who must evaluate research reports as consumers and possible future contributors to the literature through their own writing. *Journal Article Writing and Publication* by Dr. Sharon A. Gutman, a former editor of the *American Journal of Occupational Therapy*, provides specific guidelines based on the most commonly accepted reporting standards for the preparation and writing of general research studies, intervention effectiveness studies, instrument development and testing studies, and case reports. A section is devoted to helping authors understand the rules governing the reporting of statistical data in text and tables. Separate sections help authors understand the manuscript preparation and submission process, the revision process, and the etiquette guiding communication with editors and reviewers. Guidelines for the preparation of scholarly discussion papers and editorials are also provided. *Journal Article Writing and Publication* also features a section that aims to help doctoral students and newly minted faculty turn academic work and dissertations into publishable journal articles. Suggestions are provided to help clinicians turn clinical data into research databases that could serve as the foundation for pilot studies. Finally, information is provided to help authors better understand the ethical considerations of publication, including plagiarism, dual submissions, inappropriate authorship, copyright, and conflict of interest.

Nutrition Research Drummond, Alison Murphy-Reyes, 2017-02-10 *Nutrition Research Concepts Applications* is written for nutrition students in undergraduate and graduate programs who are beginning to develop the skills necessary to become knowledgeable research consumers, conduct and document research projects, and understand how to use research findings in practice. The first text of its kind to clearly explain each section of a research paper to students who are new at the process, this title outlines how to read and analyze research by learning concepts such as sampling, design, or relative risk, and then seeing these abstract ideas brought to life in actual research articles. Students also apply these concepts in Application Questions and Critical Thinking Exercises in which they write abstracts, answer questions about evidenced-based study data, or use a checklist to critique a study. Students also learn the nuts and bolts of

searching databases for appropriate articles using systematic reviews such as the Academy of Nutrition and Dietetics
