have only recently become more active in promoting green building. The volume places emphasis on development paths, learning processes and innovations. The focus of the case studies is not restricted to purely technological aspects but also integrates regulatory, procedural, institutional and other processes and routines and their influence on the variations of the building sector. The diversity of the selected case studies offers the reader the opportunity to gain a thorough understanding of how sustainability developments have unfolded in different city regions. Case study specific catalogues of transition paths provide insights to inform policy debates and planning processes. The catalogues identify crucial innovations: technological, regulatory, etc. and explain the factors and circumstances that have led to their success and broader acceptance in Freiburg, Vancouver, Luxembourg and Brisbane. With the help of a number of micro case studies within each of the four city regions, the case studies also offer ground for comparison and identification of differences. The book represents the outcome of the GreenRegio project, which stands for Green building in regional strategies for sustainability, multi actor governance and innovative building technologies in Europe, Australia and Canada. GreenRegio was a 3 year CORE INTER research project funded by the National Research Fund Luxembourg (FNR) and the German Research Foundation (DFG). **Intimate Partner Violence: Prevention and Intervention** Anna C. Baldry, Frans Willem Winkel, 2008. This book focuses on the importance of assessing risk in domestic violence cases to prevent and reduce its escalation into homicide, so called uxoricide. Spousal killers in a substantial number of cases exhibit a history of prior spousal violence. In addition to this, witnessing violence has debilitating effects on children. For this reason, domestic violence is also becoming a hot political issue on the European agenda. Integrating the US and Canadian experiences with the European ones increases the book's value and broadens perspectives. Assessing the risk and adopting appropriate measures can help reduce the risk of escalation of violence. It aims at gathering contributions from experts in the field of domestic violence and victimisation to present state of the art research in the risk assessment of domestic violence cases.
