Motivating Change: Sustainable Design and Behaviour in the Built Environment Robert Crocker, Steffen Lehmann, 2013-07-24 Today's most pressing challenges require behaviour change at many levels from the city to the individual. This book focuses on the collective influences that can be seen to shape change. Exploring the underlying dimensions of behaviour change in terms of consumption, media, social innovation and urban systems, the essays in this book are from many disciplines including architecture, urban design, industrial design and engineering, sociology, psychology, cultural studies, waste management and public policy. Aimed especially at designers and architects, *Motivating Change* explores the diversity of current approaches to change and the multiple ways in which behaviour can be understood as an enactment of values and beliefs, standards and habitual practices in daily life and more broadly in the urban environment.

Working with Students with Disabilities Theresa A. Quigney, Jeannine R. Studer, 2016-01-22 Like no other book available, *Working with Students with Disabilities: A Guide for School Counselors* provides comprehensive coverage of school counselors' roles in special education and working with students with disabilities and connects that coverage to both the ASCA national model and CACREP standards. In *Working with Students with Disabilities*, school counselors will find thoughtful analyses of the legal and regulatory basis for many of the practices in special education, including an overview of pertinent laws including the Individuals with Disabilities Education Improvement Act and Section 504 of the Rehabilitation Act. They will gain an in-depth understanding of the leadership role that school counselors should play in supporting students, teachers and families, and they will also come away with an understanding of the common challenges like bullying, cyberbullying and successful transitioning from high school to adult life to which students with disabilities may be more vulnerable, as well as less common challenges such as behavioral difficulties, autism spectrum disorders and many more. **The American**
