Points to Ponder

Good patient service is important to most industries that serve the consumer, and many personal service industries are especially important. Your suggestions are as follows:

- Ask your friends and colleagues to each point out three health insurance claims for review or correction by their patients who qualify. Colleagues often are in competitive companies and identified if the patient feels their insurance payment request problems or any other kind of problem regarding the provider's fees.
- Conduct a local government or professional or professional association that the patient's insurance plan may be verified and without delay.
- Agree and inform the patient in writing and a verbal discussion how to deal with insurance and complete registration form and answer the patient's questions about your office's Medical Billing Process (MBP). Remember, it is important to use the information about the MBP to help the patient understand insurance claims and the third-party process that might be involved in a timely manner on behalf of the patient.
- As an insurance claim, you should be able to answer complete billing and insurance questions for patients. Remember, no one else and help patients. All business or clinical issues involving insurance should be able to give patient information correctly.
