 to spatially distributed systems Issues regarding remote measurements and indirect monitoring and control of distributed  
 systems is presented in the general framework of the recently developed ill posed inverse problems The book starts with an  
 overview of the main results in the inverse problem theory and continues with the presentation of basic results in discrete  
 inverse theory The second part presents various forward and inverse problems resulting from modeling monitoring and  
 controlling mechanical acoustic fluid and thermal systems Finally indirect and remote monitoring and control issues are  
 analyzed as cases of ill posed inverse problems Numerous numerical examples illustrate current approaches used for solving
