Advanced Soft Electronics in Biomedical Engineering

Mengxiao Chen, 2024-07-16 The book presents the latest advances in soft electronics in biomedical engineering and its potential applications in various biomedical fields The contributors provide comprehensive coverage of how soft electronics are used in diagnostics and monitoring medical therapy neural engineering and wearable and implantable systems In particular some emerging research areas such as advanced soft robotics fiber sensing technologies and power optimization strategies are explored In addition the book highlights international standardization activities in wearable technologies and implantable bioelectronics The book will benefit researchers engineers and advanced students in biomedical engineering electrical and computer engineering and materials science **Elastomeric Polymers with High Rate Sensitivity** Roshdy

George S Barsoum, 2015-07-01 Recent investigations into blast resistant properties of polyureas and other multi phase polymeric elastomers indicate that they can dissipate broad bands of frequencies such as those encountered in blast events In this unique book Elastomeric Polymers with High Rate Sensitivity Dr Roshdy Barsoum and expert contributors bring together the cutting edge testing methodologies material properties and critical design data for engineers seeking to deploy this technology Where conventional methods of resisting blast shockwave and penetration are expensive time consuming and impractical high strain rate elastomeric polymers HSREP can be cheaper quicker and more easily applied to new and old materials alike This book aids both military and civilian engineers in a range of applications from buildings and tunnels to lightweight armor ships and aircraft The book features constitutive models for software developers designing with these advanced polymers as well as a discussion of the mechanisms of interaction between high strain rate polymers and other materials It also thoroughly covers HSREP engineering methods to achieve other unique properties such as fireproofing

Material properties and design data included to enable engineers to successfully deploy this technology Cheaper quicker and more easily implemented than traditional methods of increasing blast and ballistic performance A how to guide to the engineering of high strain rate elastomeric polymers to achieve other useful properties such as fireproofing *Ending Campus Violence* Brian Van Brunt,2012-08-21 With the growth of threats and violence in higher education settings college campuses are increasingly expected to have systems in place to identify potentially aggressive individuals and intervene to ensure the safety of the campus population This book will be useful for student affairs professionals as well as college counselors psychologists social workers interested in the practical management of aggression and violence on a college campus It will also be a valuable resource for those involved in creating and running behavioral intervention teams and threat risk assessment teams Ten case studies from both the community and residential college settings provide a comprehensive overview of campus violence and how to intervene to prevent it Pertinent background information is discussed as an introduction to these narratives such as the fundamentals of aggression and violence on campuses how these behaviors can impact students faculty and staff and what can be learned from past campus violence Along with discussion questions and a review of ways to approach each situation experts in higher education forensic risk assessment law enforcement and legal issues weigh in on each case study Their perspectives offer a context and broad base of opinions and ideas on how each case could be handled Additional examples for further training of the college counselor are given through a detailed look at almost 100 incidents of violence including thwarted attacks rampage shootings and hostage situations ,
