*Los Angeles Dam and Reservoir Project, San Fernando Valley, Los Angeles County, California* United States. Federal Disaster Assistance Administration. Region Nine, 1975      *Data Analytics for Drilling Engineering* Qilong Xue, 2019-12-30

This book presents the signal processing and data mining challenges encountered in drilling engineering and describes the methods used to overcome them. In drilling engineering many signal processing technologies are required to solve practical problems such as downhole information transmission, spatial attitude of drillstring, drillstring dynamics, seismic activity while drilling, among others. This title attempts to bridge the gap between the signal processing and data mining and oil and gas drilling engineering communities. There is an urgent need to summarize signal processing and data mining issues in drilling engineering so that practitioners in these fields can understand each other in order to enhance oil and gas drilling functions. In summary, this book shows the importance of signal processing and data mining to researchers and professional drilling engineers and opens up a new area of application for signal processing and data mining scientists.
