

Intragalactic Space Stations - Part 1: What's your Cosmic Address?

Your Name:

Congratulations Commanders! You have been hired to lead a mission by the Canadian Space Agency to send a new space station to explore another star system! Over the next few weeks, it will be your job to add technologies to your space station in order to research a star system in the Milky Way Galaxy.

Your **first task** will be to use the guiding questions/resources provided to explore how we can communicate a cosmic object's position in outer space. It is your choice what grading-level tasks you would like to complete up to. You must complete the guiding questions before beginning the second task.

Your **second task** will be to come up with a draft visual representation of your space station. I would like you to be as creative as you would like for this task. Don't worry about the specific technological elements you would like to add to your station right now, as we will continue to add technologies to your station as we progress through the Space Exploration unit. You will create a final visual representation of your space station, with all of the added elements at the end of the unit! (Spent 30-45 minutes creating your visual).

Learning Outcomes:

- Describe, in general terms, the distribution of matter in star systems, galaxies, nebulae and the universe as a whole
- Identify evidence for, and describe characteristics of, bodies that make up solar systems; and compare their composition and characteristics with those of Earth

For a grading-level task to be considered "complete":

- You must answer all of the questions in the grade-level section.
- The information in your answer must be about 80% correct, so use the resources I have provided! It's okay if there are a few misunderstandings in your answers.
- The number of sentences should be used as a guideline for how many different ideas should be included in your answer.

Your mission will be complete after:

- You submit a **completed copy** of this document to Seesaw, due at the end of next class.
- You have started to create a draft visual representation of your space station. The visual representations will be completed and due next class!
