

Unit 7 Progress Check: FRQ**1. SHOW ALL YOUR WORK. REMEMBER THAT PROGRAM SEGMENTS ARE TO BE WRITTEN IN JAVA.**

Assume that the classes listed in the Java Quick Reference have been imported where appropriate. Unless otherwise noted in the question, assume that parameters in method calls are not `null` and that methods are called only when their preconditions are satisfied. In writing solutions for each question, you may use any of the accessible methods that are listed in classes defined in that question. Writing significant amounts of code that can be replaced by a call to one of these methods will not receive full credit.

This question involves the creation of user names for an online system. A user name is created based on a user's first and last names. A new user name cannot be a duplicate of a user name already assigned. You will write the constructor and one method of the `UserName` class. A partial declaration of the `UserName` class is shown below.

```
public class UserName
{
    // The list of possible user names, based on a user's first and last
    // names and initialized by the constructor.
    private ArrayList<String> possibleNames;

    /** Constructs a UserName object as described in part (a).
     * Precondition: firstName and lastName have length greater than 0
     * and contain only uppercase and lowercase letters.
     */
    public UserName(String firstName, String lastName)
    { /* to be implemented in part (a) */ }

    /** Returns true if arr contains name, and false otherwise. */
    public boolean isUsed(String name, String[] arr)
    { /* implementation not shown */ }

    /** Removes strings from possibleNames that are found in usedNames
     as described in part (b).
     */
    public void setAvailableUserNames(String[] usedNames)
    { /* to be implemented in part (b) */ }
}
```

(a) Write the constructor for the `UserName` class. The constructor initializes and fills `possibleNames` with possible user names based on the `firstName` and `lastName` parameters. The possible user names are obtained by concatenating `lastName` with different substrings of `firstName`. The substrings begin with the first character of `firstName` and the lengths of the substrings take on all values from 1 to the length of `firstName`.

The following example shows the contents of `possibleNames` after a `UserName` object has been instantiated.

Example

Science Lab Progress Check Unit C

Mike Jess

Science Lab Progress Check Unit C:

Embracing the Melody of Appearance: An Emotional Symphony within **Science Lab Progress Check Unit C**

In some sort of consumed by screens and the ceaseless chatter of instantaneous communication, the melodic splendor and mental symphony produced by the published term often diminish into the backdrop, eclipsed by the persistent noise and disturbances that permeate our lives. Nevertheless, set within the pages of **Science Lab Progress Check Unit C** a wonderful literary treasure overflowing with natural feelings, lies an immersive symphony waiting to be embraced. Constructed by a masterful musician of language, this interesting masterpiece conducts visitors on a mental journey, well unraveling the concealed tunes and profound influence resonating within each carefully constructed phrase. Within the depths with this touching examination, we will examine the book is key harmonies, analyze their enthralling publishing type, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
