believe that science has replaced faith but must it also be a death knell for mythology Evolutions brings to life the latest scientific thinking on the birth of the universe and the solar system the journey from a single cell all the way to our human minds Reawakening our sense of wonder and terror at the world around us and within us Oren Harman uses modern science to create new and original mythologies Here are the Earth and the Moon presenting a cosmological view of motherhood a panicking Mitochondrion introducing sex and death to the world the loneliness of consciousness emerging from the memory of an octopus and the birth of language in evolution summoning humankind s struggle with truth Science may not solve our existential puzzles but like the age old legends its magical discoveries can help us continue the never ending search
