Sci Fi Days Of Fear And Wonder:

Sci-Fi James Bell, 2014 The War of the Worlds Peter J. Beck, 2016-08-25 First published in 1897 H G Wells's alien invasion narrative *The War of the Worlds* was a landmark work of science fiction and one that continues to be adapted and referenced in the 21st century. Chronicling the novel's contexts, its origins, and its many multi-media adaptations, this book is a complete biography of the life and the afterlives of *The War of the Worlds*. Exploring the original text's compelling sense of place and vivid recreation of Wells's Working home and the concerns of fin de siècle Britain, the book goes on to chart the novel's immediate international impact. Starting with the initial serialisations in US newspapers, Peter Beck goes on to examine Orson Welles's legendary 1938 radio adaptation, TV and film adaptations from George Pal to Steven Spielberg, Jeff Wayne's rock opera, and the numerous other works that have taken their inspiration from Wells's original. Drawing on new archival research, this is a comprehensive account of the continuing impact of *The War of the Worlds*. *Science Fiction Cinema in the Twenty-First Century* Pablo Gómez-Muñoz, 2022-12-27 Recent films are increasingly using themes and conventions of science fiction, such as dystopian societies, catastrophic environmental disasters, apocalyptic scenarios, aliens, monsters, time travel, teleportation, and supernatural abilities, to address cosmopolitan concerns such as human rights, climate change, economic precarity, and mobility. This book identifies and analyses the new transnational turn towards cosmopolitanism in science fiction cinema since the beginning of the twenty-first century. The book considers a wide selection of examples, including case studies of films such as *Elysium*, *In Time*, 2012, Andrew Niccol's *The Host*, *Codependent Lesbian Space Alien Seeks Same*, and *Cloud Atlas*. It also questions the seeming cosmopolitanism of these narratives and exposes how they sometimes reproduce social hierarchies and exploitative practices. Dealing with diverse interdisciplinary concerns represented in cinema, this book in the *Studies in Global Genre Fiction* series will be of interest to readers and scholars working in the fields of science fiction, film, and media studies, cosmopolitanism, border theory, popular culture, and cultural studies. It will also appeal to fans of science fiction cinema and literature. Close Encounters of the Third Kind Jon Towlson, 2016-09-06 For many Close Encounters of the Third Kind CE3K is not so much a movie as a religious experience On its release in 1977 CE3K virtually redefined the science fiction film shifting it away from spaceships laser guns and bug eyed monsters into a modified form of science fiction that John Wyndham once called logical fantasy What would it be like if extra terrestrials made contact with people on Earth How would it feel Like 2001 A Space Odyssey 1968 Steven Spielberg s primary inspiration CE3K is concerned with mankind s evolution towards the stars towards a state of transcendence But Spielberg s vision hinges not so much on cool scientific intellect being the key to our next stage of evolution as on the necessary development of emotional intelligence To that end we must regain our childlike curiosity for what lies beyond the skies we must recover our capacity to experience wonder Intensity of emotion is inherent to the film s meaning and the aim of this book is to explore this in detail Along the way it delves into the film s production history explores Spielberg s remarkable cinematic realisation of the film including a comparison study of the three different release versions and considers in detail how CE3K fits into the Spielberg oeuvre

Fear, Wonder, and Science in the New Age of Reproductive Biotechnology Scott Gilbert, Clara Pinto-Correia, 2017-08-08 How does one make decisions today about in vitro fertilization, abortion, egg freezing, surrogacy, and other matters of reproduction? This book provides the intellectual and emotional intelligence to help individuals make informed choices amid misinformation and competing claims. Scott Gilbert and Clara Pinto Correia speak to the couple trying to become pregnant, the woman contemplating an abortion, and the student searching for sound information about human sex and reproduction. Their book is an enlightening read for men as well as for women, describing in clear terms how babies come into existence through both natural and assisted reproductive pathways. They update the talk for the twenty-first century: the birds, the bees, and the Petri dishes. **Fear, Wonder, and Science in the New Age of Reproductive Biotechnology** first covers the most recent and well-grounded scientific conclusions about fertilization and early human embryology. It then discusses the reasons why some of the major forms of assisted reproductive technologies were invented, how they are used, and what they can and cannot accomplish. Most important, the authors explore the emotional side of using these technologies, focusing on those who have emptied their emotions and bank accounts in a valiant effort to conceive a child. This work of science and human biology is informed by a moral concern for our common humanity.

Parabolas of Science Fiction Brian Atterby, Veronica Hollinger, 2013-10-21 Essays about the inherently collaborative nature of science fiction. As a geometric term, parabola suggests a narrative trajectory or story arc. In science fiction, parabolas take us from the known to the unknown. More concrete than themes, more complex than motifs, parabolas are combinations of meaningful setting, character, and action that lend themselves to endless redefinition and jazzlike improvisation. The fourteen original essays in this collection explore how the field of science fiction has developed as a complex of repetitions, influences, arguments, and broad conversations. This particular feature of the genre has been the source of much critical commentary, most notably through growing interest in the sf megatext, a continually expanding archive of shared images, situations, plots, characters, settings, and themes found in
