To be included in the “Medicine, General & Internal” category of the Web of Science Journal Citation Report is a distinction for a select group of 165 journals that are considered to be the most influential in this category worldwide. This means standing shoulder-to-shoulder with giants like the *New England Journal of Medicine*, *Lancet*, *JAMA*, *BMJ* and *Annals of Internal Medicine*. Here, we wish to highlight the Brazilian presence among these journals.

The Web of Science (WoS) is a multidisciplinary database that provides access to 12,171 scientific journals, and it is edited under the responsibility of the company Clarivate Analytics. It is made available in Brazil through the journals portal of the Brazilian government's funding agency CAPES, to all institutions that are members of this portal.

The Web of Science Journal Citation Report (JCR) identifies and evaluates the most important science and social science journals worldwide and offers analysis on journal performance. It thus reflects the scientific and academic literature of the highest quality. The information that the JCR provides includes the total numbers of articles and citations, and data on the journals cited and those citing them, along with other analyses.¹

The *journal impact factor* (JIF), published annually, has been eagerly awaited by researchers and journal editors around the world for the last 40 years. Its bibliometric mission has steered the scientific community towards editorial rigor and its results have influenced policies, partnerships, classifications and scientific analyses.

How is the JIF calculation made? The JIF of a given periodical for any given year (for example, 2020) is calculated from citations made during the previous year (2019, in this example) for items published in the two preceding years (2017 + 2018, in this example), divided by the number of citable items in these two years (2017 + 2018), published in that periodical.

The core collection of the Web of Science is composed of ten indexes containing thousands of periodicals. Three main citation indexes are responsible for the JIFs calculated from authors' citations, namely: Science Citation Index Expanded (SCI-Expanded), covering the years from 1900 to today (in which the *São Paulo Medical Journal* is included); Social Sciences Citation Index (SSCI), covering the years from 1900 to today; and Emerging Sources Citation Index (ESCI), covering the years from 2005 to today.² A fourth major index, the Arts & Humanities Citation Index (A&HCI), covering the years from 1975 to today, is not used to generate an impact factor.

“MEDICINE, GENERAL & INTERNAL” CATEGORY (SCI 2019)

The “Medicine, General & Internal” category of the SCI is formed by a total of 165 journals that are considered to be the group of periodicals within this field that are most influential worldwide. **Table 1** shows the top ten of these 165 journals and also highlights the three Brazilian journals that also form part of this very select list, together with their respective JIFs.³
