Policing within the Law John Eterno, 2003-07-30 At a time when police abuses and errors make the headlines it is important to understand just what goes into the decisions that police make when they are confronted with various crime scenarios in the line of duty Required to respond within the law many officers are able to respond in a legal manner to crime situations in which court decisions are written clearly and with easily applied guidelines But what happens when those decisions and laws are written in a way that invites interpretation and varies from situation to situation Based on a case study of New York City police officers this important volume analyzes how officers contend with often ambiguous laws in the face of specific crime scenarios In addition the author explores other influences on police decision making including officer characteristics and attitudes and makes policy recommendations in an effort to encourage the reinforcement of legal guidelines so that the rights of individuals are appropriately balanced with the duty to control crime Based on a survey of nearly 1 300 officers responses to specially designed hypothetical crime scenarios this study illustrates how police officers are likely to react with regard to the law in these situations While officers tend to act legally where the laws are clear less clearly articulated laws leave the police with a variety of different options for action in ambiguous situations For instance in weapons scenarios the survey showed that officers would often take advantage of ambiguity in the law with regard to how they may respond In drug scenarios officers will increase their tendency to do a search if the situation is slightly ambiguous though they will decrease their search responses when the situation appears to be highly ambiguous Eterno carefully examines the various responses and the laws that are meant to guide what police may or may not do in given situations concluding that better laws and bright line rules will help to check and balance the need to fight crime aggressively while preventing the abuse of authority that may arise in questionable circumstances

Police Responses to People with Mental Illnesses Duncan Chappell, 2014-07-16 According to the World Health Organisation during their lifetime more than one quarter of all individuals will develop one or more mental or behavioural disorders Given prevalence data like this it is not surprising that wherever they reside on the planet many persons suffering from a mental disorder or as is more commonly termed in popular parlance a mental illness are likely to come into contact with police at some stage in their lives Indeed research conducted in a number of countries suggests that about 10 per cent of all community police work involves some form of interaction with a person with a mental illness From a police perspective these encounters are not only frequent but also often sensitive and challenging Despite the difficulties associated with this important aspect of community policing surprisingly scant attention has been given to the development of empirically tested and established best practice approaches to managing police interactions with persons with mental illnesses The literature that does exist is principally derived from North American sources although more recent and interesting developments have been reported in Australia and the United Kingdom The principal aim of *Police Responses to People with Mental Illnesses* is to seek to reduce this gap in the literature by providing an international overview of some of the latest research and policy developments in the field and the challenges still to be confronted in many places in overcoming cultural and associated barriers to protecting the rights of the mentally ill This book was originally published as a special issue of *Police Practice and Research* An International Journal
