IPC consists of twelve chapters of text and twelve companion student activity books This course introduces students to the  
people places and principles of physics and chemistry It is written by internationally respected scientist author John Hudson  
Tiner who applies the vignette approach which effectively draws readers into the text and holds attention The author and  
editors have deliberately avoided complex mathematical equations in order to entice students into high school level science  
Focus is on the people who contributed to development of the Periodic Table of the Elements Students learn to read and  
apply the Table while gaining insight into basic chemistry and physics This is one of our most popular courses among high  
school students especially those who have a history of under performance in science courses due to poor mathematical and  
reading comprehension skills The course is designed for two high school transcript credits Teachers may require students to  
complete all twelve chapters for two transcript credits or may select only six chapters to be completed for one transcript  
credit for Physical Science Physics or Chemistry Compliance with state and local academic essential elements should be  
considered when specific chapters are selected by teachers As applicable to local policies transcript credit may be assigned  
as follows when students complete all 12 chapters Physical Science for one credit and Chemistry for one credit or Integrated  
Physics and Chemistry for two credits May require supplemental local classes labs      Cxc Past Papers 1987-90 Caribbean
