The Weather Companion Gary Lockhart, 2008-05-02 The Weather Companion An Album of Meteorological History Science Legend and Folklore Throughout history as farmer sailor hunter and artist humans have watched and worried about the weather We have devised ways to observe it to predict it to protect ourselves from it to take advantage of it It plays a major role in the science and folklore of every culture Gary Lockhart s The Weather Companion is a fascinating compendium of meteorological facts and fables from ancient myths to the latest research from the rain forests to the desert regions You ll learn about the meteorology of Noah s flood methods of forecasting the behavior of weather cycles weather predictors such as the thickness of corn husks the height of saw grass and the behavior of animals weather prophets and much more Gary Lockhart reveals what makes rain smell how natural barometers work and the long history of weather fish once kept to predict rain and revived during China s Cultural Revolution You ll even learn the best time to go fishing Beautifully illustrated captivating and original The Weather Companion is a delightful experience for all ages Your skies and sunsets will never be the same

Weather Architecture Jonathan Hill, 2013-06-17 Weather Architecture further extends Jonathan Hill s investigation of authorship by recognising the creativity of the weather At a time when environmental awareness is of growing relevance the overriding aim is to understand a history of architecture as a history of weather and thus to consider the weather as an architectural author that affects design construction and use in a creative dialogue with other authors such as the architect and user Environmental discussions in architecture tend to focus on the practical or the poetic but here they are considered together Rather than investigate architecture s relations to the weather in isolation they are integrated into a wider discussion of cultural and social influences on architecture The analysis of weather s effects on the design and experience of specific buildings and gardens is interwoven with a historical survey of changing attitudes to the weather in the arts sciences and society leading to a critical re evaluation of contemporary responses to climate change
