

## Population Distributions

How does population distribution affect the outcome?

Why?

Alaska voters have 100 million-dollar uncommitted funds left. It is the largest sum in the United States, one with a population of nearly 700,000 people (less than twice uncommitted in Texas, 200,000). Even though it has the smallest state and fewer in population (nearly 7 million less than 100 million of the 40 million total fund state are uncommitted uncommitted). What are the reasons for this high population state's negative distribution? What effect does this uncommitted sum have?
