**Humor and Laughter, Playfulness and Cheerfulness: Upsides and Downsides to a Life of Lightness** Willibald Ruch,Tracey Platt,René T. Proyer,Hsueh-Chih Chen,2019-08-12 The emergence of Positive Psychology has highlighted the importance of studying the good life and how to attain it Positive life outcomes such as well being thriving flourishing and happiness were discussed and investigated Among them different orientations to happiness were identified such as a life of pleasure life of meaning and life of engagement Other outcomes

such as subjective and objective fulfillment in life or societal recognition have been less studied. Among the characteristics that facilitate positive outcomes, the VIA classification of strengths and virtues distinguishes 24 strengths, with humor and playfulness being one of them. Only a small segment of humor entered the definition of humor as character strengths, namely the parts that contain some goodness. Humor as a character strength facilitates a lot of positive outcomes, such as positive emotions and positive relationships, and there is a lightness accompanying humor and playfulness. The field is broader though and transcends the definition of humor as used in positive psychology in at least two ways. First, there is actually a family of overlapping but still distinct concepts with different research traditions. We include next to humor and types of humor also laughter, playfulness, and cheerfulness. We think that more research is needed on how they do overlap and what makes them distinct. Second, while positive psychology is interested in the goodness of what we do, we want to stress that there is the need to study the non-virtuous parts as well. That is, laughter may not only be expressing amusement but scorn directed at people; humor may be benevolent but there is also sarcasm; and playfulness may elicit positive emotions but also risk-prone and immature types of behavior. Therefore, the aim of this Research Topic was to collect current perspectives on humor, playfulness, laughter, and cheerfulness in both adults and children, to study their full diversity but also interrelations and overlapping features, to introduce new instruments or ways for their assessment in future studies, and to study their causes and consequences in a variety of life domains. We encouraged studies on differences due to gender or nationality, the embodiment in different groups, e.g., class clowns, psychiatric patients, or whether or not they can be trained. We also welcomed contributions from adjacent disciplines, e.g., education, leisure studies, or therapy, counseling, and different regions of the earth. The outcome is a set of 33 manuscripts from altogether 101 authors. Not all areas are covered and not all aims were met, while we made progress, there is much left to do. In this sense, the merging of these topics may be the first milestone, but like every milestone, it only marks the beginning of a long journey.

The textbook serves as a primary textbook for courses involving research methods and paper writing, or serves as an effective supplement to courses with major research paper components. The textbook contains several practical exercises and helpful tables as well.
