Wihstutz,M.A. Pinsky,2012-12-06 During the weekend of March 16 18 1990 the University of North Carolina at Charlotte hosted a conference on the subject of stochastic flows as part of a Special Activity Month in the Department of Mathematics This conference was supported jointly by a National Science Foundation grant and by the University of North Carolina at Charlotte Originally conceived as a regional conference for researchers in the Southeastern United States the conference eventually drew participation from both coasts of the U S and from abroad This broad based participation reflects a growing interest in the viewpoint of stochastic flows particularly in probability theory and more generally in mathematics as a whole While the theory of deterministic flows can be considered classical the stochastic counterpart has only been developed in the past decade through the efforts of Harris Kunita Elworthy Baxendale and others Much of this work was done in close connection with the theory of diffusion processes where dynamical systems implicitly enter probability theory by means of stochastic differential equations In this regard the Charlotte conference served as a natural outgrowth of the Conference on Diffusion Processes held at Northwestern University Evanston Illinois in October 1989 the proceedings of which has now been published as Volume I of the current series Due to this natural flow of ideas and with the assistance and support of the Editorial Board it was decided to organize the present two volume effort     **The American Mathematical Monthly** ,1981 Includes articles as well as notes and other features about mathematics and the profession     *General Catalogue of Printed Books* British Museum.
