**Dietary Approaches to Stop Hypertension Guide: With DASH Diet Recipes and DASH Diet Slow Cooker Cookbook** Gabriel Chavez, 2014-03-18  
 March 1 2014 The DASH Diet shows significant improvements in reducing kidney stone formation conditions as compared with conventional low oxalate diets. January 3 2014 US News World Report selects the DASH diet as the best diet for the 4th year in a row. November 12 2013 The new guidelines for preventing heart disease and strokes from The American Heart Association and The American College of Cardiology recommend the DASH diet. Why has the DASH diet been ranked as the best diet the healthiest diet and the best diet for diabetes 4 years in a row? The expert panel of physicians assembled by US News World Reports chose DASH because it is proven to improve health, has a balance of healthy food groups, and it actually works. It has been proven to lower blood pressure and cholesterol and is associated with lower risk of several types of cancer: heart disease, stroke, heart failure, kidney stones, reduced risk of developing diabetes, and can slow the progression of kidney disease. Hypertension is called the silent killer because about one third of the people with it DO NOT KNOW that they have it. One in every four adults, some 50 million people in the USA alone, have high blood pressure. High blood pressure often has no warning signs or symptoms. Once it occurs, it usually lasts a lifetime. Research has shown that following a healthy eating plan can both reduce the risk of developing high blood pressure and lower an already elevated blood pressure. If uncontrolled, it can lead to heart and kidney disease and stroke. Those diagnosed with high blood pressure especially benefit. Actually ALL ADULT could follow this heart healthy plan and benefit.
