Scope For Business Studies November 2014:

Sustainable Investing Cary Krosinsky, Sophie Purdom, 2016-12-08 A seminal shift has taken place in the world of investing. A clear and overarching reality has emerged which must be solved: financial considerations must factor in sustainability considerations for ongoing societal success while sustainability issues equally need to be driven by a business case. As a result, investment practices are evolving especially towards more positive philosophies and frameworks. *Sustainable Investing* brings the reader up to speed on trends playing out in each region and asset class, drawing on contributions from leading practitioners across the globe. Implications abound for financial professionals and other interested investors as well as corporations seeking to understand future investment trends that will affect their shareholders. Thinking: Policymakers and other stakeholders also need to be aware of what is happening in order to understand how they can be most effective at helping implement and enable the changes arguably now required for economic and financial success. *Sustainable Investing* represents an essential overview of sustainable investment practices that will be a valuable resource for students and scholars of sustainable banking and finance as well as professionals and policymakers with an interest in this fast moving field.

Environmental Pollution and the Media Glenn D. Hook, Libby Lester, Meng Ji, Kingsley Edney, Chris G. Pope, Luli van der Does-Ishikawa, 2017-04-07 This book offers a theoretically informed empirical investigation of national media reporting and political discourse on environmental issues in Australia, China and Japan. It illuminates the risks, harms and responsibilities associated with climate change through an analysis of pollution, adopting an interdisciplinary approach drawing on both the social sciences and humanities. A particular strength of the work is the detailed analysis of the data using a range of both quantitative and qualitative techniques, enabling the authors to reveal in rich and compelling detail the complex relationship between risk and responsibility in the climate change discourse. The case studies of Australia, China and Japan are set in the current literature as well as in the historical context of climate change in these three countries. The analysis of the media discourse on the Great Barrier Reef in Australia demonstrates how the mining of coal for overseas markets has led to devastating harm to the life of the reef. A critical discussion of the Chinese documentary *Under the Dome* shows how this medium has played a crucial role in building awareness of the harm from atmospheric pollution among the citizens, shaping attitudes and promoting action. The first case study of Japan elucidates how cross border atmospheric pollution from China forges a chain of responsibility for responding to climate change, running from the state to society. The other case study of Japan demonstrates how smart cities have emerged as a way to mitigate the risks and harms of climate change. The Conclusion draws together the similarities and differences in how climate change is addressed in the three countries. In all, *Environmental Pollution and the Media* uncovers the dynamics of the triadic relationship among risk, harm and climate change in Australia, China and Japan. By so doing, the book makes an original and timely contribution to understanding comparative media discourse and political

Handbook on the Economics of the Internet Johannes M. Bauer, Michael Latzer, 2016-05-27. The Internet is connecting an increasing number of individuals, organizations and devices into global networks of information flows. It is accelerating the dynamics of innovation in the digital economy, affecting the nature and intensity of competition and enabling private companies, governments and the non-profit sector to develop new business models. In this new ecosystem, many of the theoretical assumptions and historical observations upon which economics rests are altered and need critical reassessment.

The Autonomy of Labour Law Alan Bogg, Cathryn Costello, ACL Davies, Jeremias Adams-Prassl, 2015-03-26. To what extent is labour law an autonomous field of study? This book is based upon the papers written by a group of leading international scholars on this theme delivered at a conference to mark Professor Mark Freedland's retirement from his teaching fellowship in Oxford. The chapters explore the boundaries and connections between labour law and other legal disciplines such as company law, competition law, contract law and public law.
