ORFELS Composite Score: A combination of multiple ORFELS scores, which provides the best overall estimate of the student's reading proficiency. For information on how to calculate the composite score, see the *ORFELS Next Benchmark Goals and Composite Score* document available from <http://d060a.org/>.

BENCHMARK GOAL (large number in top of each box): Students scoring at or above the benchmark goal have the odds in their favor (approximately 80%-90%) of achieving later important reading outcomes. These scores are identified as *At or Above Benchmark* and the students are likely to need *Core Support*.

CUT POINT FOR RISK (small number in each box): Students scoring below the cut point for risk are unlikely (approximately 10%-20%) to achieve subsequent goals without receiving additional, targeted instructional support. These scores are identified as *Below Benchmark* and the students are likely to need *Intensive Support*.

Scores below the benchmark goal and at or above the cut point for risk are identified as *Below Benchmark*. In this range, a student's future performance is harder to predict, and these students are likely to need *Strategic Support*.
