

Calibration

Your AccuGreen[®] 3000[™] spreader was calibrated at the factory. You may check the calibration as follows:

1. Adjust the micrometer setting to 6.
2. Squeeze the trigger against the handle.
3. The front edge of the shutoff bar should be flush with the calibration line engraved on the bottom of the hopper.
4. To adjust alignment, use a small wrench to turn the black calibration screw at the lower end of the control wire leading from the micrometer rate setting barrel.

Spend a few minutes on maintenance after each use

1. Never leave product in the spreader. Pour leftover material back into the package and seal the package tightly.
2. After each use, wash thoroughly to remove all material clinging to the spreader. Hot water may be required at times to remove stubborn residue. Allow the spreader to dry thoroughly in the sun.
3. Store your spreader in a clean dry place.

NOTE: This unit does not require lubrication.
