

## Laboratory: Human Population Growth

Mrs. Côté

**Answer Key**

Enviro. Science 120

### **Pre Lab Work:**

Before beginning this laboratory, answer the following questions on your own piece of paper in your notebook:

1. Define the following terms:
  - a. growth rate — describes how fast a population is increasing or decreasing and is dependent upon the birth rate and death rate
  - b. birthrate — is the number of infants born in a given year/1000 people in the population
  - c. death rate — is the number of people who die in a given year/1000 individuals in the population
  - d. zero population growth — when the population is in equilibrium or the number of births and deaths are equal
  - e. developed country — countries that highly developed economy and advanced technology
  - f. developing country — countries that are considered to have low standard of living, and undeveloped industrially
  - g. demographic transition — refers to the transition from high birth and death rates to low birth and death rates
2. What is a population explosion? How quickly is our population growing each year? What about each day?  
**A population explosion is when a population lacks limited resources so is able to grow out of control. The human population is grows about 80 million a year and 219, 178 each day.**
3. How is the growth rate of the human population calculated?  
**Growth rate = birth rate – death rate**
4. What causes a negative population growth? What causes a positive population growth?  
**Negative population growth occurs when the birth rate is less than the death rate**  
**Positive population growth occurs when the birth rate exceeds the death rate**
5. Why do the two graphs appear to have a different shape?  
**The population growth rate was much slower in the earlier years. The J-curve shows exponential population growth and the graphs are not drawn to the same scale.**
6. Using a piece of paper, create the following charts:

Country	Birthrate (%)	Death rate (%)	Population Growth 2005	Population Growth 2050	Demographic Transition	Relative Place in Transition	Sketch graph showing Blue & Pink Line
USA	2.06	0.51	0.92	-0.06	1.55	5
