Teaching

Mathematics at Secondary Level Tony Gardiner, 2016-02-08 Teaching Mathematics is nothing less than a mathematical manifesto arising in response to a limited National Curriculum and engaged with secondary schooling for those aged 11-14. Key Stage 3 in particular: this handbook for teachers will help them broaden and enrich their students' mathematical education. It avoids specifying how to teach and focuses instead on the central principles and concepts that need to be borne in mind by all teachers and textbook authors but which are little appreciated in the UK at present. This study is aimed at anyone who would like to think more deeply about the discipline of elementary mathematics in England and Wales and anywhere else. By analysing and supplementing the current curriculum, Teaching Mathematics provides food for thought for all those involved in school mathematics, whether as aspiring teachers or as experienced professionals. It challenges us all to reflect upon what it is that makes secondary school mathematics educationally, culturally and socially important. **Key Maths GCSE** David Baker, 2002-01-25 Developed for the AQA Specification, revised for the new National Curriculum and the new GCSE specifications. The Teacher File contains detailed support and guidance on advanced planning, points of emphasis, key words, notes for non-specialist, useful supplementary ideas and homework sheets. **Basic College Mathematics** Richard N. Aufmann, Vernon C. Barker, Joanne S. Lockwood, 1999
