From the Ground Up Patrick Daly, R Michael Feener, Anthony J S Reid, 2012 The tsunami that struck a dozen countries around the Indian Ocean on 26 December 2004 evoked international sympathy on a scale beyond any previous natural disaster The international relief effort broke all records both in scale and diversity with seven billion U S dollars donated from all over the world through public and private agencies for Sumatra alone Simply as a reconstruction effort therefore the disbursement of those funds and the rebuilding of housing infrastructure and economy posed major national and international challenges However this was not simply a reconstruction effort Aceh at that time was a war zone with Indonesia's military engaged in a major operation to crush a separatist rebellion that had been simmering since 1976 Even though the funds had been donated for tsunami relief any real reconstruction of Aceh had to consider the impact of the conflict on the well being of the population as well as governance and administrative capacities This volume serves the purpose not only of discussing some of the lessons of the Aceh reconstruction and peace processes but also of maintaining critical links between Aceh and the international community after the initial tranches of aid expire

Linguistics and Language Behavior Abstracts, 2009-04 **Thomas Kuhn** Juan V. Mayoral, 2025-09-22 This new biography of Thomas S Kuhn pays attention to the continuous development of his ideas Mayoral provides a comprehensive overview of Kuhn's life and work The book explores how Kuhn's theory develops from its beginnings at Harvard University in the early 1950s through the early 1990s at the MIT and also describes Kuhn's parallel lifetime Between those decades 1950s and 1990s Kuhn went through different academic institutions obtained a high status as a public intellectual and shifted from the history of science to the philosophy of science and back as his main research target All of this left a trace in his philosophical view of science enriching and changing it since his early training as a theoretical physicist In this book Kuhn is considered as an intellectual in evolution and his contributions are assessed against the backdrop of the different contexts that he traversed Therefore there shall not be a static figure of this intellectual as there shall not be a static figure of the surrounding intellectual contexts either At the same time however this book is planned so that each chapter provides the reader with a

picture of a significant period in Kuhn's development and the main ideas that can be observed in it. The book is useful for upper undergraduates in philosophy especially in philosophy of science in general history and history of science in the social sciences and other fields of humanities and for scientifically trained individuals interested in this author. Kuhn scholars shall find this book useful for their studies on Kuhn insofar as new unpublished documents are employed, new facts about Kuhn's life are provided and a full interpretation of Kuhn's evolving system of philosophy of science is built and discussed.

Resources in Education, 1997-04 **Global Meaning Making** Lori Czop Assaf, Patience Sowa, Katina Zammit, 2022-08-23. *Global Meaning Making* disrupts and interrogates the contradictions and tensions in language and literacy; global scholarship reimagining global approaches that respect the histories, ways of knowing, needs, hopes, and values of voices beyond the western, including those from the Global South. **New Literacies and Teacher Learning** Michele Knobel, Judy Kalman, 2016-03-30. *New Literacies and Teacher Learning* examines the complexities of teacher professional development today in relation to new literacies and digital technologies set within the wider context of strong demands for teachers to be innovative and to improve students' learning outcomes. Contributors hail from Argentina, Australia, Canada, Finland, Mexico, Norway, and the U.S. and work in a broad range of situations, grade levels, activities, scales, and even national contexts. Projects include early year education through to adult literacy education and university contexts, describing a range of approaches to taking up new literacies and digital technologies within diverse learning practices. While the authors present detailed descriptions of using various digital resources like movie editing software, wikis, video conferencing, Twitter, and YouTube, they all agree that digital stuff, while important, is not the central concern. Instead, what they foreground in their discussions are theory-informed pedagogical orientations, collaborative learning theories, the complexities of teachers' workplaces, and young people's interests. Thus, a key premise in this collection is that teaching and learning are about deep engagement, representing meanings in a range of ways. These include acknowledging relationships and knowledge, thinking critically about events, phenomena, and processes, and participating in valued social and cultural activities. The book shows how this kind of learning doesn't simply occur in a one-off session but takes time, commitment, and multiple opportunities to interact with others to explore, play, make mistakes, and get it right. **Handbook of College Reading and Study Strategy Research**,
