The Composition of Meaning Alice ter Meulen, Werner Abraham, 2004-10-31 In the modular design of generative theory the syntax semantics interface has accounted all along for meanings at the level of Logical Form The syntax pragmatics interface on the other hand is the result of what one may call the pragmatic turn in the linguistic theory where content is partitioned into given and new information In other words the structural division of the clause has been subjected to criteria of information or discourse structure Both interfaces require a structurally descriptive inventory whose specific shapes can be motivated on theory internal grounds only The present collection of original articles develops the concept of these interfaces further The papers in the first section focus on the syntax semantics interface those in the second section on the syntax pragmatics interface

Political Identity and Social Change Jamie Frueh, 2012-02-01 Political Identity and Social Change builds upon the constructivist theory of political identity to explore the social changes that accompanied the end of apartheid in South Africa To gain a better understanding of how structures of identity changed along with the rest of South Africa s institutions Frueh analyzes three social and political conflicts the Soweto uprisings of 1976 the reformist constitutional debates of 1983 1984 and post apartheid crime Analyzing these conflicts demonstrates how identity labels function as structures of social discourse how social activity is organized through these structures and how both the labels and their power have changed during the course of South Africa s transition In this way the book contributes not only to the study of South African society but also provides lessons about the relationship between identity and social change

Monthly Catalog of United States Government Publications United

States. Superintendent of Documents, 1952 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index *The Gulf Between* Jan Burger, 1960 **Issues in Formal German(ic) Typology** Werner Abraham, C. Jan-Wouter Zwart, 2002 This book takes up a variety of general syntactic topics which either yield different solutions in German in particular or which lead to different conclusions for theory formation One of the main topics is the fact that languages that allow for extensive scrambling between the two verbal poles V 2 and V last need to integrate discourse functions like thema and rhema into the grammatical description This is attempted in terms of Minimalism thus extending the functional domain Special attention is given to the asymmetrical scrambling behavior of indefinites vs definites and their semantic interpretation Related topics are Transitive expletive sentences types of existential sentences with either BE or HAVE the that trace phenomenon and its semantics negative polarity items ellipsis and gapping passivization double negation all of which have extensive effects both on distributional behavior and semantic disambiguation reaching far beyond effects observable in English with its rigid unscramble word order **Assessing Academic Literacy in a Multilingual Society** Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience *Press Digest* , 1966 **History, languages, and lexicographers** Ladislav Zgusta, 2017-08-21 No detailed description available for History languages and lexicographers **Papers** Kroeber Anthropological Society, 1962 **Structure Preserved** C. Jan-Wouter Zwart, Mark de Vries, 2010 Structure is at the rock bottom of all explanatory sciences Jan Koster Forty years ago the hypothesis that underlying the bewildering variety of syntactic phenomena are general and unified structural patterns of unexpected beauty and simplicity gave rise to major advancements in the study of Dutch and Germanic syntax with important implications for the theory of grammar as a whole Jan Koster was one of the central figures in this development and he has continued to explore the structure preserving hypothesis throughout his illustrious career This collection of articles by over forty syntacticians celebrates the advancements made in the study of syntax over the past forty years reflecting on the structural principles underlying syntactic phenomena and emulating the approach to syntactic analysis embodied in Jan Koster's teaching and research

Triggers Anne Breitbarth, Henk van Riemsdijk, 2008-08-22 The concept of trigger is a core concept of Chomsky's Minimalist Program. The idea that certain types of movement are triggered by some property of the target position is at least as old as the notion that the movement of noun phrases to the subject position is triggered by their need to receive nominative case. In more recent versions of syntactic theory, triggering mechanisms are thought to regulate all of movement. Furthermore, a quite narrow range of triggering mechanisms is permitted. As is to be expected, such a restrictive approach meets a variety of difficulties. Specifically, the question is whether all triggering elements required to cover displacement of all kinds in natural language can be independently motivated. Further, how can a trigger theory which crucially relies on the idea that all movement is obligatory deal with apparently optional movement processes? Are there adequate means to express the triggering function in all cases? More radically, are all movement phenomena really the result of the checking of trigger features? And what about apparent triggering factors that are external to syntax, such as prosody, can they be captured in a rigid trigger theory? In other words, could certain aspects of triggered movement be due to interface conditions? Such is the range of questions addressed by the fourteen contributions to this book. They cover a considerable range of languages including Afrikaans, Breton, Bulgarian, Dutch, English, French, German, Gungbe, Hungarian, Italian, Japanese, Kiswahili, Romanian. These papers present materials both empirical and theoretical that will not fail to have considerable impact on the further development of the concept of trigger in syntactic theory. Expression and Interpretation of Negation Henriëtte de Swart, 2010-05-03 This study in cross linguistic semantics deploys the framework of bi-directional Optimality Theory to develop a typology of the relationship between syntax and semantics in negation markers and negation indefinites. **Focus on South Africa** Vivian de Klerk, 1996-02-23 This volume brings together a range of studies on various aspects of English and its use in Southern Africa. Experts in their field have written chapters on topics including the history and development of English in South Africa, the characteristics of particular pan-ethnic varieties of English which have evolved in South Africa including black, Indian and coloured varieties as well as the unique features of the English of South Africa's southern neighbours Swaziland, Zimbabwe, Zambia and Malawi. Other contributions focus on English in relation to issues such as standardisation, lexicography, education, language planning, language attitudes and interaction patterns. The book will be of primary interest to students of linguistics and language but should also be relevant to educationists, sociologists and historians. Frankie & Stankie Barbara Trapido, 2013-07-18 Dinah and her sister Lisa are growing up in 1950s South Africa where racial laws are tightening. They are two little girls from a dissenting liberal family. Big sister Lisa is strong and sensible while Dinah is weedy and arty. At school, the sadistic Mrs Vaughan Jones is providing instruction in mental arithmetic and racial prejudice. And then there's the puzzle of lunch break. Would you rather have a native girl or a koelie to make your sandwiches? A first year classmate asks. But Dinah doesn't know the answer because it's her dad who makes her sandwiches. As the apparatus of repression rolls on, Dinah finds her own way. As we follow her journey through childhood and adolescence

we enter into one of the darker passages of twentieth century history
