Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume Greg J. Duncan and Richard J. Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children. The authors offer a brilliant synthesis of recent research on inequality and its effects on families, children, and schools. They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students. Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school. All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale. Together they offer a powerful vision of what good instruction in effective schools can look like. The authors conclude by outlining the elements of a new agenda for education reform. Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation's future depends. Research in Education, 1974 **Implementation of Large-Scale Education Assessments** Petra Lietz, John C. Cresswell, Keith F. Rust, Raymond J. Adams, 2017-03-07 Presents a comprehensive treatment of issues related to the inception, design, implementation, and reporting of large scale education assessments. In recent years many countries have decided to become involved in international educational assessments to allow them to ascertain the strengths and weaknesses of their student populations. Assessments such as the OECD's Programme for International Student Assessment (PISA), the IEA's Trends in Mathematics and Science Study (TIMSS), and Progress in International Reading Literacy Study (PIRLS) have provided opportunities for comparison between students of different countries on a common international scale. This book is designed to give researchers, policy makers, and practitioners a well grounded knowledge in the design, implementation, analysis, and reporting of international assessments. Readers will be able to gain a more detailed insight into the scientific principles employed in such studies, allowing them to make better use of the results. The book will also give readers an understanding of the resources needed to undertake and improve the design of educational assessments in their own countries and regions. Implementation of Large Scale Education Assessments Brings together the editors' extensive experience in creating, designing, implementing, analysing, and reporting results on a wide range of assessments. Emphasizes methods for implementing international studies of student achievement and obtaining high quality data from cognitive tests and contextual questionnaires. Discusses the methods of sampling, weighting, and variance estimation that are commonly encountered in international large scale assessments. Provides direction and stimulus for improving global educational assessment and student learning. Is written by experts in the field with an international perspective. Survey researchers, market researchers,

and practitioners engaged in comparative projects will all benefit from the unparalleled breadth of knowledge and experience in large scale educational assessments gathered in this one volume
