The Scientific Letters and Papers of James Clerk Maxwell: Volume 1, 1846-1862 James Clerk Maxwell, 1990-10-26

This is a comprehensive edition of Maxwell's manuscript papers published virtually complete and largely for the first time. Maxwell's work was of central importance in establishing and developing the major themes of the physics of the nineteenth century: his theory of the electromagnetic field and the electromagnetic theory of light and his special place in the history of physics. His fecundity of imagination and the sophistication of his examination of the foundations of physics give particular interest and importance to his writings. Volume I 1846-1862 documents Maxwell's education and early scientific work and his major period of scientific innovation: his first formulation of field theory, the electromagnetic theory of light and the statistical theory of gases. Important letters and manuscript drafts illuminate this fundamental early work and the volume includes his letters to friends and family, general essays and lectures and juvenilia. This open access book discusses the impact of human-induced global climate change on the regional climate and monsoons of the Indian subcontinent adjoining Indian Ocean and the Himalayas. Asia datasets The IPCC assessment reports published every 6 7 years constitute important reference materials for major policy decisions on climate change adaptation and mitigation While the IPCC assessment reports largely provide a global perspective on climate change the focus on regional climate change aspects is considerably limited The effects of climate change over the Indian subcontinent involve complex physical processes on different space and time scales especially given that the mean climate of this region is generally shaped by the Indian monsoon and the unique high elevation geographical features such as the Himalayas the Western Ghats the Tibetan Plateau and the adjoining Indian Ocean Arabian Sea and Bay of Bengal This book also presents policy relevant information based on robust scientific analysis and assessments of the observed and projected future climate change over the Indian region
