

AP® PSYCHOLOGY

2017 SCORING GUIDELINES

Question 1

Rachel is an excellent high school student who earns high grades in challenging classes. She has recently been hired as a part-time lab assistant at a medical clinic. She is concerned that the job will affect her school performance.

Part A

Provide a specific example that clearly illustrates how each of the following would inhibit Rachel's success at her new job.

- Stereotype threat
- Adrenal glands
- Lack of REM sleep

Part B

Provide a specific example that clearly illustrates how each of the following would enhance her performance as a student with a challenging academic schedule.

- Distributed practice
- Reciprocal determinism
- Self-efficacy

General Considerations

1. Answers must be presented in sentences, and sentences must be cogent enough for the meaning of the response to come through. Spelling and grammatical mistakes do not reduce the score of a response, but spelling must be close enough that the reader is convinced of the word.
2. Do not score any notes made on the question section of the booklet. Score only what has been written in the blanks provided in the booklet.
3. Definitions alone will not score, but they may be used to enhance the application.
4. Within a point, a student will not be penalized for misinformation unless it directly contradicts correct information that would otherwise have scored a point. A correct application with incorrect definition is not considered a direct contradiction and should score the point.
5. Rubric examples provided for each point are not to be considered exhaustive.
6. Responses that simply parrot or repeat the terms from the question will not score.
7. A response can score point only if it clearly conveys what part of the question is being answered. It is possible to infer what part of the question is being answered if it is consistent with the order of the question.
