Psychological Evaluation of the Developmentally and Physically Disabled Jean-Pierre Fouque, Vincent B. Van Hasselt, 2013-06-29 The past decade has witnessed a considerable upsurge of clinical and research interest in the problems of developmentally and physically the fields of psychology disabled persons Indeed professionals from special education rehabilitation psychiatry and social work have all directed attention to the development and implementation of evaluation and remedial programs The heightened activity in this area is in part a result of early assessment research with these populations which provided preliminary evidence of difficulties in social and emotional adjustment in many disabled individuals In response to these findings many intervention efforts have been implemented to deal with these issues and improve the life situation of the disabled Also there were indications that developmentally and physically disabled children often were deprived of adequate educations As a result legal and legislative initiatives have been enacted in recent years to make public education available to all students irrespective of disability Central to all therapeutic and psychoeducational endeavors with the disabled is psychological evaluation Only through careful and comprehensive psychological evaluation can areas of deficit as well as strengths be identified Once treatment targets and goals have been ascertained psychological evaluation is needed to determine the efficacy of intervention strategies However the field of psychological evaluation in general and with disabled persons in particular has become highly specialized This is largely a function of the changing roles of psychological evaluators

Assessing Listening and Spoken Language in Children with Hearing Loss Tamala S.

Bradham, K. Todd Houston, 2014-12-30 *Practitioner's Guide to Developmental and Psychological Testing* Glen P. Aylward, 2013-06-29 The practice of primary health care has expanded beyond the traditional medical model Primary care physicians and allied professionals are called upon more frequently to address parental concerns about developmental delays poor school performance or behavioral problems As a result pediatricians family practitioners pediatric nurses social workers and speech language specialists are faced with the issue of developmental and psychological testing The degree of the clinician's involvement in testing varies from interpretation of reports to performing screening or assessments In many cases the primary health care professional assumes the role of case manager Unfortunately cooperation between disciplines often has been limited because of poor communication particularly in regard to developmental and psychological testing where acronyms statistics and jargon abound Even professionals from mental health disciplines such as child psychiatrists or psychiatric social workers sometimes are overwhelmed The purpose of this book therefore is to provide the clinician with practical information regarding developmental and psychological testing thereby making the health care professional an educated consumer This text does not simply describe how psychologists perform testing rather it provides information to help clinicians understand what the tests contain what their strengths and limitations are and how they can be incorporated into practice
