

had begun to develop extreme stress and anxiety during the year due to excessive academic workload, simultaneously aggravating the household environment, and developing depressive symptoms (sadness, crying, severe self-criticism, exhaustion, and trouble sleeping).

The depression worsened until it reached a distress level on April 28, 2022. During her last psychological evaluation, her symptoms included the following:

Emotional symptoms: sadness, lack of interest in almost most of the activities, temper outbursts

Cognitive symptoms: difficulty concentrating, recurrent thoughts of death

Behavioral symptoms: crying, self-isolation

Physiological symptoms: difficulty falling asleep, tiredness

The major stressors in Dale's life are mainly personal and primarily social ones. Since the pandemic's peak, she had lost physical contact with friends. She had expressed during the psychological evaluation that they had been supportive and helpful to her when in times of difficult moments in her life. Due to the loss of physical contact, which has been replaced with online interactions, she mostly visits websites to seek someone she can talk to and entertain herself.

She used to derive significant satisfaction from impulsive buying, frequent consumption of a massive amount of food, irregularity of her sleeping patterns, and isolating herself. While she had almost a lack of interest, mainly due to excessive academic workload and toxic household environment, it does appear that it had been a significant stressor for her depressed mood.
