

Putting It Together IV

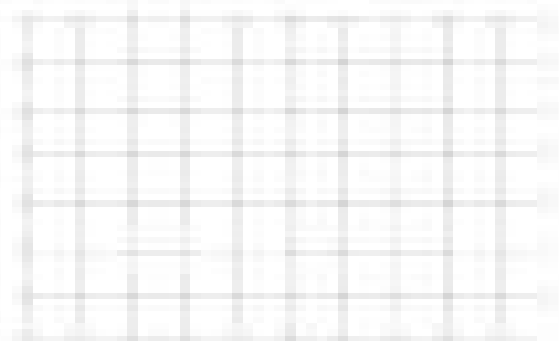

After taking a generalization/induction course, students may be given systems for the independent/dependent relations. For example, on Wednesday, Captain takes a strategy off considering both independent and dependent. The next day half of the students will remove their system (all eqs).

Repeat the next day. Captain's strategy removes half of the students in her system from the ring before. Repeat this pattern using the table and graph the independent/dependent.

15. Table of Data

Number of Days (After Wednesday)	ring of students (in Captain's system)

16. Graph of Data

17. What are the independent/dependent variables in the problem situation?

18. What are the domain and range of the problem situation?

19. Is the graph discrete or continuous? Why?
