Music in Contemporary French Cinema Phil Powrie, 2017-06-29 This book explores composed scores and pre-existing

music in French cinema from 1985 to 2015 so as to identify critical musical moments It shows how heritage films construct space through music generating what Powrie calls third space music while also working to contain the strong women characters found in French heritage films through the use of leitmotifs and musical cues He analyses fiction films in which the protagonists perform at the piano showing how musical performance supports the performance of gender Building on aspects of musical performance and in particular the use of songs performed in films Powrie uses a database of 300 films since 2010 to theorize the intervention of music at critical moments as a crystal song Applying Roland Barthes s concept of the punctum and Gille Deleuze s concept of the crystal image Powrie establishes the importance of the crystal song which reconfigures time as a crystallization of past present and future
