Claim:

There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Resources in Education, 1999 **Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning** Niess, Margaret L., Gillow-Wiles, Henry, 2021-06-25 The COVID 19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety As schools emptied remote learning rapidly expanded through online services and video chatrooms Unfortunately this disrupted many students and teachers who were not accustomed to remote classrooms This challenge has forced K 12 teachers to think differently about teaching Unexpectedly and with little time to prepare they have been confronted with redesigning their curriculum and instruction from face to face to online virtual classrooms to protect students from the COVID 19 virus while ensuring that these new online initiatives remain sustainable and useful in the post pandemic world As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction their instruction both in online and face to face will impact what and how students learn in the 21st century The Handbook of Research on Transforming Teachers Online Pedagogical Reasoning for Engaging K 12 Students in Virtual Learning examines the best practices and pedagogical reasoning for designing online strategies that work for K 12 virtual learning The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world The following chapters present instructional strategies for multiple grade levels and content areas best practices that work clearly describing why they work and the teachers pedagogical reasoning that supports online implementations The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face to face and virtual environments as an essential design component Covering such topics as K 12 classrooms pedagogical reasoning and virtual learning this text is perfect for professors teachers students educational designers and developers instructional technology faculty distance learning faculty and researchers interested in the subject *A Parent's Guide to The Science of Learning* Edward Watson, Bradley Busch, 2021-08-30 Supporting parents in the quest to help their children learn as effectively and efficiently as possible A Parent s Guide to The Science of Learning translates 77 of the most important and influential studies on student learning into easily digestible overviews This book will develop parents understanding of crucial psychological research so that they can help their children improve how they think feel and behave in school and indeed in life Each overview summarises the key findings from the research and offers tips hints and strategies for how you can use them in your home Covering important areas such as memory motivation thinking biases and parental attitudes this book makes complicated research simple accessible and practical From large to small scale studies from the quirky to the iconic this book breaks down key research to provide parents with the need to know facts Essentially it is a one stop shop that offers guidance on how to parent even better A Parent s Guide to The Science of

Learning answers the sort of questions that every parent wants to know but doesn't know where to find the answers. This includes the small everyday questions through to the big life-changing ones. Some of the questions answered in this book include: How much sleep does your child need? Should I actually help them with their homework? Why does my child forget what they have just learnt? How much screen time is too much? What can I do to help them do better at school? Is it really that important that we all eat meals together? How can I help my child learn to better manage their emotions? How can I encourage them to be a better independent learner? A hugely accessible resource, this unique book will provide parents with the knowledge they need to best support their children's learning and development.
