## **Nothing A Very Short Introduction:**

*Nothing* Frank Close, 2009-06-25 What is nothing What remains when you take all the matter away Can empty space a void exist This Very Short Introduction explores the science and the history of the elusive void from Aristotle who insisted that the vacuum was impossible via the theories of Newton and Einstein to our very latest discoveries and why they can tell us extraordinary things about the cosmos Frank Close tells the story of how scientists have explored the elusive void and the rich discoveries that they have made there He takes the reader on a lively and accessible history through ancient ideas and cultural superstitions to the frontiers of current research He describes how scientists discovered that the vacuum is filled with fields how Newton Mach and Einstein grappled with the nature of space and time and how the mysterious aether that was long ago supposed to permeate the void may now be making a comeback with the latest research into the Higgs field We now know that the vacuum is far from being empty it seethes with virtual particles and antiparticles that erupt spontaneously into being and it also may contain hidden dimensions that we were previously unaware of These new discoveries may provide answers to some of cosmology's most fundamental questions what lies outside the universe and if there was once nothing then how did the universe begin ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

**Nothing: A Very Short Introduction** Frank Close, 2009-06-25 What is the void What remains when you take all the matter away Can empty space nothing exist This text explores the science history of the elusive void from Aristotle's theories to black holes quantum particles why our very latest discoveries about the vacuum can tell us extraordinary things about the cosmos

**The Calculus Story** David Acheson, 2017 Acheson introduces the fundamental ideas of calculus through the story of how the subject developed from approximating to imaginary numbers and from Newton's falling apple to the vibrations of an electric guitar Back cover

[An Anthropology of Nothing in Particular](#) Martin Demant Frederiksen, 2018-08-31 There have been claims that meaninglessness has become epidemic in the contemporary world One perceived consequence of this is that people increasingly turn against both society and the political establishment with little concern for the content or lack of content that might follow Most often encounters with meaninglessness and nothingness are seen as troubling Meaning is generally seen as being a cornerstone of the human condition as that which we strive towards This was famously explored by Viktor Frankl in *Man's Search for Meaning* in which he showed how even in the direst of situations individuals will often seek to find a purpose in life But what then is at stake when groups of people negate this position What exactly goes on inside this apparent turn towards nothing in the engagement with meaninglessness And what happens if we take the meaningless seriously as an empirical fact

[It's Nothing, Seriously](#) John McGreal, 2016-04-21 It's Silence Soundly It's Nothing Seriously and It's Absence Presently continue

The It Series published by Matador since The Book of It 2010 They constitute another stage in an artistic journey exploring the visual and audial dialectic of mark word and image that began over 25 years ago In their aesthetic form the books are a decentred trilogy united together in a new concept of The Bibliograph All three present this new aesthetic object which transcends the narrow limits of the academic bibliography The alphabetical works also share a tripartite structure and identical length The Bibliograph itself is characterised by its strategic place within each book as a whole as well as by the complex variations in meaning of the dominant motifs nothingness absence and silence which recur throughout the alphabetical entries that constitute the elements of each text It's Nothing Seriously for example addresses the amusing paradox that so much continues to be written today about nothing The aleatory character of the entries in the texts encourage the modern reader to reflect on each theme and to read them in a new way The reader is invited as well to examine their various inter textual relations across given conventional boundaries in the arts and sciences at several levels of physical psychical social reproduction

*Architecture* Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic

**Wakan Tanka** John Bennett, 2021-02-25 Where did we come from Why are we here Is there a god In our modern world many people yearn for answers to these most fundamental of life's questions having become disillusioned with trite explanations and troubled by narratives that deny their intuitive spirituality Beginning with some of our most ancient ancestors Wakan Tanka traces the evolution of humanity through the ages Citing paleontological and archaeological discoveries along with recent genetic evidence it recounts how mankind evolved from the earliest mammals into anatomically and behaviourally modern humans Wakan Tanka describes how human culture and spirituality evolved in concert with anatomy Showing how humankind has since very ancient times had an instinctual moral sense it discusses how our spirituality has given us an appreciation for both the aesthetic and divine aspects of life as reflected in our cultures and artistic endeavours By comparing philosophical and religious views of creation with modern scientific theory Wakan Tanka reaches the conclusion that rather than conflicting these views are remarkably similar and equally valid ways of describing the same reality Indeed our scientific knowledge and spiritual beliefs can be harmonized providing us with a deeper understanding of ourselves of creation and of life's purpose

**Urban Ethics Under Conditions Of Crisis: Politics,**

**Architecture, Landscape Sustainability And Multidisciplinary Engineering** Konstantinos Moraitis, Stamatina Th Rassia, 2019-03-20 Urban Ethics under Conditions of Crisis investigates the states of urban planning architectural design sustainability landscape architecture and engineering and examines their correlation with social attitudes and dispositions that can impact on socio cultural and political engagement internationally in conditions of crisis The theme of the book emphasizes the need to acknowledge the controversial character of contemporary social life under critical social conditions in correlation with urban space It concerns the evaluation of critical issues such as *Narratives of Nothing in 20th-Century Literature* Meghan Vicks, 2017-04-20 The concept of nothing was an enduring concern of the 20th century As Martin Heidegger and Jean Paul Sartre each positioned nothing as inseparable from the human condition and essential to the creation or operation of human existence as Jacques Derrida demonstrated how all structures are built upon a nothing within the structure and as mathematicians argued that zero the number that is also not a number allows for the creation of our modern mathematical system Narratives of Nothing in 20th Century Literature suggests that nothing itself enables the act of narration Focusing on the literary works of Vladimir Nabokov Samuel Beckett and Victor Pelevin Meghan Vicks traces how and why these writers give narrative form to nothing demonstrating that nothing is essential to the creation of narrative that is how our perceptions are conditioned how we make meaning or madness out of the stuff of our existence how we craft our knowable selves and how we exist in language
