How much do you vary in your observations?

Traits are physical characteristics you share with your parents. In this investigation, you observe an inheritance of your observable traits and compare yours to the observable traits of your classmates. Record their distinctive characteristics of each characteristic (three generations).

## Observing your nose traits:

a. The genetic trait of noses comes in different forms of observable traits. Each one takes from two different traits. Study the chart below that shows the possibilities available.

b. Working with a partner, observe each other's traits for characteristics of fingerprints. Circle your total of each characteristic. Circle it. **NOTE:** For finger tip, record your observations with handwriting of your own design. **Handwriting Finger tip:**
