Recent Advances In Intelligent Technologies And Information Systems:

Recent Advances in Intelligent Technologies and Information Systems, 2015 This book brings together current practices and innovations in the management and processing of diverse big data sets through technological integration focusing on concepts such as semantic technologies open source tools and soft computing *Recent Advances in Intelligent Technologies and Information Systems* Sugumaran, Vijayan, 2014-10-31 The amount of data used in the business world has been growing at a rapid and exponential rate These large volumes of data have led not only to the rise of big data analytics but to the need for improvements and advancements in the management of it Recent Advances in Intelligent Technologies and Information Systems brings together current practices and innovations in the management and processing of diverse big data sets through technological integration Focusing on concepts such as semantic technologies open source tools and soft computing this book is an integral reference source for professionals researchers and practitioners interested in the application of technological advancements

Recent Advances in Information Systems and Technologies Álvaro Rocha, Ana Maria Correia, Hojjat Adeli, Luís Paulo Reis, Sandra Costanzo, 2017-03-27 This book presents a selection of papers from the 2017 World Conference on Information Systems and Technologies WorldCIST 17 held between the 11st and 13th of April 2017 at Porto Santo Island Madeira Portugal WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences and challenges involved in modern Information Systems and Technologies research together with technological developments and applications The main topics covered are Information and Knowledge Management Organizational Models and Information Systems Software and Systems Modeling Software Systems Architectures Applications and Tools Multimedia Systems and Applications Computer Networks Mobility and Pervasive Systems Intelligent and Decision Support Systems Big Data Analytics and Applications Human Computer Interaction Ethics Computers Health Informatics Information Technologies in Education and Information Technologies in Radiocommunications

Developments and Trends in Intelligent Technologies and Smart Systems Sugumaran, Vijayan, 2017-09-13 Due to the exponential rise of emerging technology there have been significant developments in intelligent systems This has facilitated increasing opportunities for new applications and improvements Developments and Trends in Intelligent Technologies and Smart Systems is a critical source of scholarly material on the design implementation and integration of intelligent applications across numerous industries Highlighting a range of innovative topics such as enterprise modeling remote patient monitoring and service oriented architecture this book is ideally designed for researchers engineers computer scientists academics students and professionals interested in the latest applications of intelligent technologies

Handbook of Research on Advancements in Robotics and Mechatronics Habib, Maki K., 2014-12-31 The field of mechatronics integrates modern engineering science and technologies with new ways of thinking enhancing the design of products and manufacturing processes This synergy enables the creation and evolution of

new intelligent human oriented machines The Handbook of Research on Advancements in Robotics and Mechatronics presents new findings practices technological innovations and theoretical perspectives on the the latest advancements in the field of mechanical engineering This book is of great use to engineers and scientists students researchers and practitioners looking to develop autonomous and smart products and systems for meeting today s challenges Intelligent Technologies Himansu Das,Chittaranjan Pradhan,Surbhi Bhatia Khan,Kuan Ching Li,2025-08-04 This book discusses automated computing systems which are mostly powered by intelligent technologies like artificial intelligence machine learning image recognition speech processing cloud computing etc to perform complex automated tasks which are not possible by traditional computing systems The chapters are extended version of research works presented at third PhD Research Symposium in various advanced technologies used in the field of computer science This book provides an opportunity for the researchers to get ideas regarding the ongoing works that help them in formulating problems of their interest The academicians can also be benefited to know about the current research trends that smooth the way to guide their students to carry out research work in the proper direction The industry people will be also facilitated to know about the current advances in research work and materialize the research work into industrial applications **Innovative Research in Attention Modeling and Computer Vision Applications** Pal, Rajarshi,2015-10-02 Robotics and autonomous systems can aid disabled individuals in daily living or make a workplace more productive but these tools are only as effective as the technology behind them Robotic systems must be able to accurately identify and act upon elements in their environment to be effective in performing their duties Innovative Research in Attention Modeling and Computer Vision Applications explores the latest research in image processing and pattern recognition for use in robotic real time cryptography and surveillance applications This book provides researchers students academicians software designers and application developers with next generation insight into the use of computer vision technologies in a variety of industries and endeavors This premier reference work includes chapters on topics ranging from biometric and facial recognition technologies to digital image and video watermarking among many others Handbook of Research on Artificial Intelligence Techniques and Algorithms Vasant, Pandian,2014-11-30 For decades optimization methods such as Fuzzy Logic Artificial Neural Networks Firefly Simulated annealing and Tabu search have been capable of handling and tackling a wide range of real world application problems in society and nature Analysts have turned to these problem solving techniques in the event during natural disasters and chaotic systems research The Handbook of Research on Artificial Intelligence Techniques and Algorithms highlights the cutting edge developments in this promising research area This premier reference work applies Meta heuristics Optimization MO Techniques to real world problems in a variety of fields including business logistics computer science engineering and government This work is particularly relevant to researchers scientists decision makers managers and practitioners *Handbook of Research on Swarm Intelligence in Engineering* Bhattacharyya, Siddhartha,Dutta, Paramartha,2015-04-30 Swarm Intelligence has

recently emerged as a next generation methodology belonging to the class of evolutionary computing As a result scientists have been able to explain and understand real life processes and practices that previously remained unexplored The Handbook of Research on Swarm Intelligence in Engineering presents the latest research being conducted on diverse topics in intelligence technologies such as Swarm Intelligence Machine Intelligence Optical Engineering and Signal Processing with the goal of advancing knowledge and applications in this rapidly evolving field The enriched interdisciplinary contents of this book will be a subject of interest to the widest forum of faculties existing research communities and new research aspirants from a multitude of disciplines and trades

AI-Enabled Social Robotics in Human Care Services Kautish, Sandeep,Chaubey, Nirbhay Kumar,Goyal, S.B.,Whig, Pawan,2023-04-24 As social robots and the artificial intelligence AI that powers them become more advanced they will likely take on more social and work roles There is a variety of ways social robots can be engaged in human life and they can leave an impact in terms of ease of use productivity and human support The interactivity and receptivity of social robots can encourage humans to form social relationships with them But now robots are intended to perform socially intelligent and interactive services like reception guidance emotional companionship and more which makes social human robot interaction essential to help improve aspects of quality of life as well as to improve the efficiency of human care services AI Enabled Social Robotics in Human Care Services addresses recent advances in the latest technologies new research results and developments in the area of social robotics and AI and the latest developments in the field and future directions that can be beneficial to human society and human care services Covering topics such as agriculture waste management systems elder care and facial emotion recognition this premier reference source is an essential resource for AI professionals computer scientists robotics engineers human care professionals students and educators of higher education librarians researchers and academicians

Fostering Cross-Industry Sustainability With Intelligent Technologies Mishra, Brojo Kishore,2024-01-22 In today s context of intricate global challenges encompassing climate crises resource scarcity and social disparities the imperative for sustainable development has never been more pressing While academic scholars and researchers are instrumental in crafting solutions they often grapple with the intricate balance between theoretical concepts and practical implementation This gap impedes the transformation of innovative ideas into tangible societal progress leaving a void where effective real world strategies for cross industry sustainability should flourish Fostering Cross Industry Sustainability With Intelligent Technologies seeks to bridge this divide This book is more than just a collection of pages it serves as a roadmap for those determined to make a tangible impact It brings together a diverse group of esteemed experts from various disciplines offering a comprehensive spectrum of actionable insights all grounded in the ethical imperatives of inclusivity and environmental responsibility Anchored in the United Nations Sustainable Development Goals SDGs this volume serves as a guiding star channeling theoretical expertise into practical solutions For academic scholars scientists innovators and students alike Fostering Cross Industry Sustainability

With Intelligent Technologies is the definitive guidepost It fosters a profound understanding of the real world implications of research promoting interdisciplinary collaborations that transcend conventional boundaries This comprehensive book presents a wealth of sustainable science and intelligent technology applications all while emphasizing the importance of ethics and societal impact With visionary insights woven throughout its pages it calls upon humanity to envision a future where challenges transform into opportunities and sustainable development becomes an attainable reality

ECSM2016-Proceedings of the 3rd European Conference on Social Media Christine Bernadas, Delphine Minchella, 2016-06-21 Recent Advances in Artificial Intelligence Research and Development Jordi Vitrià, Petia Radeva, Isabel Aguiló, 2004 Artificial Intelligence AI is a scientific field of longstanding tradition with origins in the early years of computer science Today AI has reached a level of maturity that allows us to build highly sophisticated systems which perform very different tasks Nevertheless its evolution has opened up a number of new problems ranging from specific algorithms to system integration which remain elusive and assure a long life for this research field Research progress in this area is today an international challenge that must be supported by world class meetings and organizations but in spite of this fact there is also an objective need for meetings and organizations that support and disseminate research at other levels This book focuses on new and original research on Artificial Intelligence **Recent Advances in Electrical and Information Technologies for Sustainable Development** Soumia El Hani, Mohamad Essaaidi, 2019-02-08 The book includes the best extended papers which were selected from the 3rd International Conference of Electrical and Information Technologies ICEIT 2017 Morocco The book spans two inter related research domains which shaped modern societies solved many of their development problems and contributed to their unprecedented economic growth and social welfare Selected papers are based on original and high quality research They were peer reviewed by experts in the field They are grouped into five parts Part I deals with Power System and Electronics topics that include Power Electronics Energy Conversion Actuators Micro Nanotechnology etc Part II relates to Control Systems and their applications Part III concerns the topic of Information Technology that basically includes Smart Grid Information Security Cloud Computing Distributed Big Data etc Part IV discusses Telecommunications and Vehicular Technologies topics that include Green Networking and Communications Wireless Ad hoc and Sensor Networks etc Part V covers Green Applications and Interdisciplinary topics that include intelligent and Green Technologies for Transportation Systems Smart Cities etc This book offers a good opportunity for young researchers novice scholars and whole academic sphere to explore new trends in Electrical and information Technologies *Applications of Intelligent Technologies in Healthcare* Fazlullah Khan, Mian Ahmad Jan, Muhammad Alam, 2018-11-09 This book covers topics related to medical practices from communications technology point of view The book provides detailed inside information about the use of health informatics and emerging technologies for the well being of patients Each chapter in this book focuses on a specific development in the use of informatics in healthcare In general each

chapter uses various emerging technologies such as Internet of Things IoT Big Data Cloud computing Wireless Body Area Networks WBAN for various health related illness such as tuberculosis heart diseases asthma and various epidemic outbreaks The book is intended both for communications engineers with a healthcare focus and medical researchers

Intelligent Technologies for Healthcare Business Applications Athina Bourdena, Constandinos Mavromoustakis, Evangelos K. Markakis, George Mastorakis, Evangelos Pallis, 2024-08-12 This book covers a wide range of applications and scenarios of intelligent technologies for healthcare business applications The authors adopt an interdisciplinary approach with both theoretical and practical approaches in order to be relevant to multiple audiences This book encapsulates fundamental and cutting edge research paradigms of intelligent healthcare environments and addresses related open ended research issues The authors also explore recent advances disseminate state of the art techniques and deploy novel technologies in intelligent healthcare services and applications The book features a broad appeal to electrical electronic computer software and telecommunications engineers in the healthcare space Covers a range of applications and scenarios of intelligent technologies for healthcare business applications Explores advances disseminates techniques and deploys novel technologies in intelligent healthcare services Features paradigms of intelligent healthcare environments and addresses open ended research issues

Recent Advances in Ambient Assisted Living - Bridging Assistive Technologies, E-Health and Personalized Health Care W. Chen, J.C. Augusto, F. Seoane, 2015-12-10 Recent advances in the field of ambient assistive living have addressed the integration of assistive technologies e health and personalized healthcare with the aim of enabling improved social experience as well as achieving better health outcomes This book focuses on ambient assisted living systems and services for healthcare a multi disciplinary field encompassing areas such as electrical engineering computer science user centered design and medicine The book is divided into three parts personalized healthcare monitoring technologies ICT for ambient assistive living and healing environments The topics covered include sensor systems wearable technologies patient monitoring home monitoring personalized healthcare user centered design ethical challenges and clinical evaluation Providing an overview of new developments in e health and personalized healthcare the book will be of interest to engineers designers and others working in the healthcare industry and to medical practitioners

Recent Advances and Prospects in Urban E-Planning Nunes Silva, Carlos, 2024-12-31 The increasing integration of digital technologies in urban planning offers transformative opportunities for improving governance citizen engagement and operational efficiency However it also presents significant challenges including ethical concerns data bias and potential inequalities in access and outcomes Understanding these dynamics is crucial as governments and planners strive to balance innovation with inclusivity and accountability Ultimately it highlights the critical role of urban e planning in addressing the complexities of modern cities while fostering equitable and sustainable development Recent Advances and Prospects in Urban E Planning comprises empirical findings and insights on the ongoing transformation of the field of urban planning due to the extensive use of

information and communication technologies in the planning process its recent advancements and the prospects for the next years By examining global case studies and reflecting on technological advancements this book underscores the importance of equipping urban planning processes with tools that enhance transparency effectiveness and responsiveness to societal needs Covering topics such as 3D models healthcare access and waste governance this book is an excellent resource for urban planners policymakers academicians researchers technology developers data scientists postgraduate students and more

Recent Advances in Artificial Intelligence Research and Development René Alquézar,Cecilio Angulo,Alberto Ortiz,Joan Torrens,2017-10-15 Artificial intelligence in all its forms is increasingly interwoven into all our lives and remains one of the most lively areas of discussion and interest in technology today This book presents the proceedings of the 20th International Conference of the Catalan Association for Artificial Intelligence CCIA 2017 Recent Advances in Artificial Intelligence Research and Development held in Deltebre Terres de l'Ebre Spain in October 2017 Despite its title this annual conference is not only for researchers from the Catalan Countries but is an international event which attracts participants from countries all around the world In total 41 original contributions were submitted to CCIA 2017 Of these 21 were accepted as long papers for oral presentation and 13 were accepted as short papers to be presented as posters These 34 submissions appear in this book organized around a number of different topics including agents and multi agent systems artificial vision and image processing machine learning artificial neural networks cognitive modeling fuzzy logic and reasoning robotics and AI applications The book also includes abstracts of the 3 presentations by invited speakers The book offers a representative sample of the current state of the art in the artificial intelligence community and will be of interest to all those working with AI worldwide

Recent Advances in Digital System Diagnosis and Management of Healthcare Kamran Sartipi,Thierry Edoh,2021-02-03 Technologically supported healthcare management is beginning to take center stage as advances occur in many aspects of healthcare involving big data artificial intelligence and improved user interfaces This volume provides a perspective on a number of such advances ranging from homecare with remote network support and primary homecare to telemedicine application for pediatric cardiology A special section with chapters on Clinical Decision Support Systems CDSS addresses topics in improved human interfaces intelligent support for better quality home and institutional care effective big data visualization for decision makers and gathering data from multiple sources to support the battle against resistant bacteria
