Guide on digital agricultural extension and advisory services Food and Agriculture Organization of the United Nations, 2023-03-30 Digital agricultural extension and advisory services AEAS have a great potential to enhance accessibility delivery transparency scope and impacts of information and services for smallholder farmers However this potential is often unfully harnessed and the benefits of digital AEAS unequally distributed due to an evident widening digital divide between rural and urban areas gender and different social groups both within and among regions Due to low level e literacy and digital skills particularly smallholder farmers in rural areas in developing countries have limited access to and utilization of digital AEAS Considering the above mentioned benefits of digital AEAS their poor uptake by smallholder farmers and the importance of digital empowerment of smallholder farmers in particular this guide targeting smallholder farmers in need of digital AEAS as its principal users provides a set of tools to enhance their digital skills in terms of basic knowledge and skills on using digital tools methods of access to digital AEAS methods of access to e commerce and capacity building The Hitchhiker's Guide to AI Arthur Goldstuck, 2025-08-01 Arthur Goldstuck is a veteran of understanding how new technologies interact with all parts of society This book provides an informative and accessible look at what AI might have in store for us DR BENJAMIN ROSMAN Professor of AI and Robotics University of the Witwatersrand The Hitchhiker s Guide to AI is a thoughtful book that takes a close look at one of the most significant developments of the year with specific reference to Africa and developing economies It is food for thought written with a light touch while raising many of the most salient questions SANDRA LAURENCE TechCentral The Hitchhiker s Guide to AI is one of the most interesting and easy to follow books of its kind CHRIS GIBBONS Acumen Explore the ever evolving world of AI with ease discovering its practical applications and the magic it s creating REHANA RUTTI Womans World Did you know that AI helped South Africa to win the 2023 Rugby World Cup That Africa led the way in small language models That AI has been supporting farmers in Kenya for the last decade The Hitchhiker s Guide to AI The African Edge reframes the conversation about AI through the lens of human roles and merges global advances with distinctly African realities From farmers using AI to track bee movements to school pupils guided by WhatsApp tutors to musicians experimenting with machine made beats this book explores how everyday people across the African continent are shaping and being shaped by the rise of machine intelligence Rather than obsessing over distant futures or Silicon Valley breakthroughs this book brings AI down to earth Through the eyes of local and international teachers coders executives and artists it tells the story of Africa s AI moment not as a catch up game but as reframing the global narrative Insightful grounded and provocative it s a guide to navigating the most transformative technology of our age with feet firmly planted on African soil and eyes wide open to the global context *Universal Access in Human-Computer Interaction: Aging and Assistive Environments* Constantine Stephanidis, Margherita Antona, 2014-05-15 The four volume set LNCS 8513 8516 constitutes the refereed proceedings of the 8th International Conference on Universal

Access in Human Computer Interaction UAHCI 2014 held as part of the 16th International Conference on Human Computer Interaction HCII 2014 held in Heraklion Crete Greece in June 2014 jointly with 14 other thematically similar conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this four volume set The 75 papers included in this volume are organized in the following topical sections design for aging health and rehabilitation applications accessible smart and assistive environments assistive robots and mobility navigation and safety      *Software Methodologies* Capers Jones,2017-07-06 This comprehensive reference uses a formal and standard evaluation technique to show the strengths and weakness of more than 60 software development methodologies such as agile DevOps RUP Waterfall TSP XP and many more Each methodology is applied to an application of 1000 function points using the Java language Each methodology produces a characteristic set of results for development schedules productivity costs and quality The intent of the book is to show readers the optimum kinds of methodologies for the projects they are concerned with and to warn them about counter indications and possible harm from unsuitable methodologies      Different Engines Andrés Burbano,2023-03-31 Different Engines investigates the emergence of technologies in Latin America to create images sounds video games and physical interactions The book contributes to the construction of a historiographical and theoretical framework for understanding the work of creators who have been geographically and historically marginalized through the study of five exemplary and yet relatively unknown artifacts built by engineers scientists artists and innovators It offers a broad and detailed view of the complex and sometimes unlikely conditions under which technological innovation is possible and of the problematic logics under which these innovations may come to be devalued as historically irrelevant Through its focus on media technologies the book presents the interactions between technological and artistic creativity working towards a wider understanding of the shifts in both fields that have shaped current perceptions practices and design principles while bringing into view the personal social and geopolitical singularities embodied by particular devices It will be an engaging and insightful read for scholars researchers and students across a wide range of disciplines such as media studies art and design architecture cultural history and the digital humanities      **A Practitioner's Guide to European Patent Law** Paul England,2022-09-08 This new edition is a comprehensive and practical guide to European patent law a ius commune The book highlights the areas of consistency and difference between the most influential European patent law jurisdictions the European Patent Office England and Wales France Germany and the Netherlands The book also draws insights from further afield with contributions from other very active patent jurisdictions including Italy Sweden Denmark and Switzerland

Uniquely the book addresses European patent law by subject matter area assessing the key national and EPO approaches together rather than nation by nation Each chapter outlines the common ground between the national approaches and provides a guide for the possible application of European patent law in national courts and the UPC in the future In addition to featuring content on new countries the second edition includes new chapters dedicated to the substantive aspects of FRAND declarations and evidence There is also an expanded commentary on construction including common terms used in patent claims A must read for anyone working in the field of European patent law

**Channel Characterization and Modeling for Vehicular Communications** Xiang Cheng,Ziwei Huang,Lu Bai,2023-12-04 This book presents and develops comprehensive knowledge of vehicular channel characteristics and proper vehicular channel models The studied topics contain the propagation characteristics of vehicular communications such as a time frequency non stationary single input single output SISO vehicle to vehicle V2V non geometry stochastic model NGSM a space time non stationary massive multiple input multiple output MIMO V2V regular shaped geometry based stochastic model RS GBSM and a space time non stationary massive MIMO V2V irregular shaped geometry based stochastic model IS GBSM Each is introduced with characteristics then discussed in detail Finally this book discusses future research directions to inspire further investigation in the field of vehicular channels from three different perspectives

Enabling Person-Centric Healthcare Using Ambient Assistive Technology Paolo Barsocchi,Naga Srinivasu Parvathaneni,Amik Garg,Akash Kumar Bhoi,Filippo Palumbo,2023-09-01 This book experiences the future of patient centered healthcare and dives into the latest advancements and transformative technologies that are revolutionizing the well being of individuals around the globe The readers can join authors on an engaging journey as the authors explore the captivating realm of ambient assisted living and unlock its immense potential for improving healthcare outcomes This book goes beyond mere exploration it invites readers to embark on a voyage of discovery as authors unveil the outcomes of groundbreaking research ideas With a diverse range of applications from deep learning in healthcare to cutting edge models the authors offer a comprehensive view of the opportunities and challenges that lie ahead Whether you re a healthcare professional an academic seeking the latest insights or a researcher delving into the realms of ambient assistive technology biomedical engineering or computational intelligence this book is an invaluable resource Additionally postgraduate students pursuing data engineering systems find it to be an essential guide Each chapter stands independently providing a comprehensive overview of problem formulation and its tangible outcomes The readers can immerse themselves in the world of patient centered healthcare today and become part of the forefront of innovation

**Game Theory for Next Generation Wireless and Communication Networks** Zhu Han,Dusit Niyato,Walid Saad,Tamer Başar,2019-06-27 Discover the very latest game theoretic approaches for designing modeling and optimizing emerging wireless communication networks and systems with this unique text Providing a unified and comprehensive treatment throughout it explains basic concepts and theories for designing novel distributed wireless

networking mechanisms describes emerging game theoretic tools from an engineering perspective and provides an extensive overview of recent applications A wealth of new tools is covered including matching theory and games with bounded rationality and tutorial chapters show how to use these tools to solve current and future wireless networking problems in areas such as 5G networks network virtualization software defined networks cloud computing the Internet of Things context aware networks green communications and security This is an ideal resource for telecommunications engineers and researchers in industry and academia who are working on the design of efficient scalable and robust communication protocols for future wireless networks as well as graduate students in these fields      The Technical and Social History of

Software Engineering Capers Jones, 2014 Pioneering software engineer Capers Jones has written the first and only definitive history of the entire software engineering industry Drawing on his extraordinary vantage point as a leading practitioner for several decades Jones reviews the entire history of IT and software engineering assesses its impact on society and previews its future One decade at a time Jones assesses emerging trends and companies winners and losers new technologies methods tools languages productivity quality benchmarks challenges risks professional societies and more He quantifies both beneficial and harmful software inventions accurately estimates the size of both the US and global software industries and takes on unexplained mysteries such as why and how programming languages gain and lose popularity      **The Running**

**Athlete** Gian Luigi Canata, Henrique Jones, Werner Krutsch, Patricia Thoreux, Alberto Vascellari, 2022-04-22 This book explores running in a broad range of sport disciplines providing a full spectrum coverage on this extremely important and commonly diffused activity The volume opens with basic information such as biomechanics physiology training principles nutrition and then presents discipline specific aspects of running in several individual and team sports Each chapter is structured organically to offer a uniform and thorough information For each sport the authors examine biomechanical physiological and training specificities as well as injury epidemiology and preventive measures Filling a gap in literature this book appeals not only to sports physicians orthopaedic surgeons trainers coaches fellows and researchers but also to athletes in the various disciplines Written in collaboration with ESSKA it provides a useful toolkit to those readers interested in the state of the art update on the running athlete      Science and Technologies for Smart Cities Sara Paiva, Sérgio Ivan

Lopes, Rafik Zitouni, Nishu Gupta, Sérgio F. Lopes, Takuro Yonezawa, 2021-05-21 This book constitutes the refereed proceedings of the 6th Annual Smart City 360 Summit Due to COVID 19 pandemic the conference was held virtually The volume combines selected papers of seven conferences namely AISCOVID 2020 International Conference on AI assisted Solutions for COVID 19 and Biomedical Applications in Smart Cities EdgeIoT 2020 International Conference on Intelligent Edge Processing in the IoT Era IC4S 2020 International Conference on Cognitive Computing and Cyber Physical Systems CiCom 2020 International Conference on Computational Intelligence and Communications S Cube 2020 International Conference on Sensor Systems and Software SmartGov 2020 International Conference on Smart Governance for Sustainable

Smart Cities and finally the Urb IOT 2020 International Conference on IoT in Urban Space      **Middleware Solutions for Wireless Internet of Things** Paolo Bellavista, Carlo Giannelli, Sajal K. Das, Jiannong Cao, 2019-07-15 The proliferation of powerful but cheap devices together with the availability of a plethora of wireless technologies has pushed for the spread of the Wireless Internet of Things WIoT which is typically much more heterogeneous dynamic and general purpose if compared with the traditional IoT The WIoT is characterized by the dynamic interaction of traditional infrastructure side devices e.g. sensors and actuators provided by municipalities in Smart City infrastructures and other portable and more opportunistic ones such as mobile smartphones opportunistically integrated to dynamically extend and enhance the WIoT environment A key enabler of this vision is the advancement of software and middleware technologies in various mobile related sectors ranging from the effective synergic management of wireless communications to mobility adaptivity support in operating systems and differentiated integration and management of devices with heterogeneous capabilities in middleware from horizontal support to crowdsourcing in different application domains to dynamic offloading to cloud resources only to mention a few The book presents state of the art contributions in the articulated WIoT area by providing novel insights about the development and adoption of middleware solutions to enable the WIoT vision in a wide spectrum of heterogeneous scenarios ranging from industrial environments to educational devices The presented solutions provide readers with differentiated point of views by demonstrating how the WIoT vision can be applied to several aspects of our daily life in a pervasive manner      **Cyber Sovereignty** Lucie Kadlecová, 2024-06-11 Governments across the globe find themselves in an exploratory phase as they probe the limits of their sovereignty in the cyber domain Cyberspace is a singular environment that is forcing states to adjust their behavior to fit a new arena beyond the four traditional domains air sea space and land to which the classic understanding of state sovereignty applies According to Lucie Kadlecov governments must implement a more adaptive approach to keep up with rapid developments and innovations in cyberspace in order to truly retain their sovereignty This requires understanding the concept of sovereignty in a more creative and flexible manner Kadlecov argues that the existence of sovereignty in cyberspace is the latest remarkable stage in the evolution of this concept Through a close study of the most advanced transatlantic cases of state sovereignty in cyberspace the Netherlands the US Estonia and Turkey Cyber Sovereignty reveals how states have pursued new methods and tactics to fuel the distribution of authority and control in the cyber field imaginatively combining modern technologies with legal frameworks In times of booming competition over cyber governance between democracies and authoritarian regimes worldwide cyber sovereignty is a major topic of interest and concern for the international community      *Smittestopp – A Case Study on Digital Contact Tracing* Ahmed Elmokashfi, Olav Lysne, Valeriya Naumova, 2022-07-19 This open access book describes Smittestopp the first Norwegian system for digital contact tracing of Covid 19 infections which was developed in March and early April 2020 The system was deployed after five weeks of development and was active for a little more than two months when a drop in infection levels in

Norway and privacy concerns led to shutting it down The intention of this book is twofold First it reports on the design choices made in the development phase Second as one of the only systems in the world that collected population data into a central database and which was used for an entire population we can share experience on how the design choices impacted the system s operation By sharing lessons learned and the challenges faced during the development and deployment of the technology we hope that this book can be a valuable guide for experts from different domains such as big data collection and analysis application development and deployment in a national population as well as digital tracing

Digitalization and Competition Policy in Japan Shuya Hayashi,Koki Arai,2024-01-03 This book organizes the intent and purpose of the Japanese competition law Antimonopoly Act to address the digitalized socio economy and provides a detailed explanation of its basic content as well as advanced issues It includes an overview of Japanese law and its international position a basic understanding of the big data and AI issues in today s competition law and perspectives on high tech regulation In addition it includes a variety of important topics ranging from exploring principles to tackle digital regulatory realities to understanding and analyzing the competitive realities of multisided markets It also examines the relationship between information and competition law and that between consumer and competition law Digitalization is a key concept in our economy and society today Carbon neutrality initiatives the need to improve productivity globalization and new ways of working are all seeking breakthroughs by way of digitalization What s more digitalizationrequires free and fair competition in order to encourage technological innovation The search for transparent and clear competition laws is essential to promote efficient and effective research and development and to promote public awareness through competition
