Pevsner Stephen Games,2010-03-31 The first biography of Nikolaus Pevsner the best known and most important architectural historian of the 20th century      **Pevsner** Stephen Games,2010-06-02      *Pevsner: The BBC Years* Stephen Games,2016-03-09 Pevsner The BBC Years gives the first full account of Sir Nikolaus Pevsner s engagement with the BBC at a time when both were the dominant institutions in their own fields Pevsner as the most persuasive figure in architecture and art history the BBC as the country s sole broadcaster A German emigr Pevsner was not at first trusted to speak on the air and was only invited to appear at the very end of the war in spite of his growing eminence in academia and publishing With the arrival of the Third Programme in 1946 however he quickly became a broadcasting celebrity and one whom senior BBC figures regarded as essential and novel listening Pevsner The BBC Years looks at the sudden rise in Pevsner s standing at the BBC at what he was admired for and at the circumstances surrounding his being commissioned in the mid 1950s to give the first series of Reith Lectures on an arts subject the relationship between visual expression and national identity The book explains the roles played by Geoffrey Grigson Basil Taylor Anna Kallin and Leonie Cohn in advancing Pevsner s BBC career analyses the literary character of his broadcasting and considers the function of his talks as an extension of European belletrism It also demonstrates the significance of his concurrent editorship of the King Penguin series of books In addition Pevsner The BBC Years documents the unravelling of Pevsner s reputation It shows how he was caught between changing fashions in media culture and damaged by doubts about the safety of his ideas both within the BBC and externally among British conservatives who found him too radical and American radicals who found him too conservative In Pevsner The BBC Years correspondence from the BBC s archives provides a case study of scholarly thought being exposed to independent scrutiny a process with lessons for today      **The Mental Life of the Architectural Historian** Gevork Hartoonian,2014-08-11 Starting with the question concerning the discursive formation of architectural history the chapters compiled in this book attempt to re read the historiography of early modern architecture from the point of view of the theoretical work produced since the post war era Central to the objectives of the argument are the ways in which firstly architectural history differs from the traditions of art history and secondly that the historical narrative works its autonomy through theoretical representation the discursive flow of which is interrupted by the historian s urge to support arguments with references to buildings texts drawings and historical events The historians discussed in this volume are those regularly addressed by most critics revisiting modern architectural history Individual chapters are dedicated to N Pevsner H R Hitchcock and S Giedion an economy of selection that is formative for a critical understanding of the canon established by these historians Themes such as periodization autonomy and time are discussed and the coda of the final chapter expands on the scope of critical historiography popularised by Kenneth Frampton and Manfredo Tafuri      **George A. Kubler and the Shape of Art History** Thomas F. Reese,2023-04-04 An illuminating intellectual biography of a pioneering and singular figure

in American art history Art historian George A Kubler 1912 1996 was a foundational scholar of ancient American art and archaeology as well as Spanish and Portuguese architecture During over five decades at Yale University he published seventeen books that included innovative monographs major works of synthesis and an influential theoretical treatise In this biography Thomas F Reese analyzes the early formation broad career and writings of Kubler casting nuanced light on the origins and development of his thinking Notable in Reese s discussion and contextualization of Kubler s writings is a revealing history and analysis of his Shape of Time a book so influential to students scholars artists and curious readers in multiple disciplines that it has been continuously in print since 1962 Reese reveals how pivotal its ideas were in Kubler s own thinking rather than focusing on problems of form as an ordering principle he increasingly came to sequence works by how they communicate meaning The author demonstrates how Kubler who professed to have little interest in theory devoted himself to the craft of art history discovering and charting the rules that guided the propagation of structure and significance through time

**Art and Politics in Roger Scruton's Conservative Philosophy** Ferenc Hörcher, 2022-12-12 This book covers the field of and points to the intersections between politics art and philosophy Its hero the late Sir Roger Scruton had a longstanding interest in all fields acquiring professional knowledge in both the practice and theory of politics art and philosophy The claim of the book is therefore that contrary to a superficial prejudice it is possible to address the philosophical issues of art and politics in the same oeuvre as the example of this Cambridge educated analytical philosopher proves Accordingly the book has a bold thesis on the general theoretical level mapping the connections between politics art and philosophy However it also has a pioneering commitment on the level of the particular offering the first full length study into the philosophical legacy of Roger Scruton probably the most important British conservative philosopher of the late 20th and the first decades of the 21st century It also allows reader to look into the philosopher s fascination with Central European art and culture Finally it also provides a daring analysis of the late Scruton s metaphysical inspirations connecting the arts and especially music with religion and the bonds of love

**The Architecture of Art History** Mark Crinson, Richard J. Williams, 2018-12-13 What is the place of architecture in the history of art Why has it been at times central to the discipline and at other times seemingly so marginal What is its place now Many disciplines have a stake in the history of architecture sociology anthropology human geography to name a few This book deals with perhaps the most influential tradition of all art history examining how the relation between the disciplines of art history and architectural history has waxed and waned over the last one hundred and fifty years In this highly original study Mark Crinson and Richard J Williams point to a decline in the importance attributed to the role of architecture in art history over the last century which has happened without crisis or self reflection The book explores the problem in relation to key art historical approaches from formalism to feminism to the social history of art and in key institutions from the Museum of Modern Art to the journal October Among the key thinkers explored are Banham Baxandall Giedion Panofsky Pevsner Pollock Riegl Rowe Steinberg

Wittkower and W lfflin The book will provoke debate on the historiography and present state of the discipline of art history and it makes a powerful case for the reconsideration of architecture Birkbeck Joanna Bourke,2022 In 2023 Birkbeck University of London celebrates 200 years of educating working people in central London It was founded in 1923 as the London Mechanics Institution and from its inception was a pioneering and radical institution This history is animated by the conviction that Birkbeck is its people Their thoughts and ambitions hopes and dreams labour and laughter are what this book describes celebrates and occasionally laments It explores the history of education as well as the history of place politics radicalism class race gender disciplinarity theatre food leisure war and everyday encounters Most of all this book is about ideas What does it mean to be educated How have these meanings changed over time What makes Birkbeck students unique What does it mean to be fully human exploiting our faculties in order to become better people Nikolaus Pevsner Susie Harries,2011-08-18 Born Nikolai Pevsner into a Russian Jewish family in Leipzig in 1902 Nikolaus Pevsner was a dedicated scholar who pursued a promising career as an academic in Dresden and G ttingen When in 1933 Jews were no longer permitted to teach in German universities he lost his job and looked for employment in England Here over a long and amazingly industrious career he made himself an authority on the exploration and enjoyment of English art and architecture so much so that his magisterial county by county series of 46 books on The Buildings of England first published 1951 74 is usually referred to simply as Pevsner As a critic academic and champion of Modernism Pevsner became a central figure in the architectural consensus that accompanied post war reconstruction as a general practitioner of architectural history he covered an astonishing range from Gothic cathedrals and Georgian coffee houses to the Festival of Britain and Brutalist tower blocks Susie Harries explores the truth about Nikolaus Pevsner s reported sympathies with elements of Nazi ideology his internment in England as an enemy alien and his sometimes painful assimilation into his country of exile His Heftchen secret diaries he kept from the age of 14 for another sixty years reveal hidden aspirations and anxieties as do his numerous letters he wrote to his wife Lola every day that they were apart Harries is the first biographer to have read Pevsner s private papers and through them to have seen into the workings of his mind Her definitive biography is not only rich in context and far ranging but is also brought to life by quotations from Pevsner himself He was born a Jew but converted to Lutheranism trained in the rigour of German scholarship he became an Everyman in his copious commissions publications broadcasts and lectures on art architecture design education town planning social housing conservation Mannerism the Bauhaus the Victorians Zeitgeist Englishness and how a nation s character may or must be reflected in its art His life as an outsider yet an insider at the heart of English art history illuminates both the predicament and the prowess of the continental migr s who did so much to shape British culture after 1945 Women and Architectural History Dana Arnold,2024-07-01 In this book prominent architectural historians who happen to be women reflect on their practice and the intervention this has made in the discipline Of particular concern are the ways in which feminine subjectivities have been embodied in the discourses of

architectural history Each of the chapters examines the author's own position and the disruptive presence of women as both subject and object in the historiography of a specific field of enquiry The aim is not to replace male lives with female lives or to write women into the masculinist narratives of architectural history Instead this book aims to broaden the discourses of architectural history to explore how the potentially unnatural rule of women subverts canonical norms through the empowerment of otherness rather than a process of perceived emasculation The essays examine the historiographic and socio cultural implications of the role of women in the narratives and writing of architectural history with particular reference to Western traditions of scholarship on the period 1600 1950 Rather than subscribing to a single position individual voices critically engage with past and present canonical histories disclosing assumptions biases and absences in the architectural historiography of the West This book is a crucial reflection upon historiographical practice exploring potential openings that may contribute further transformation of the theory and methods of architectural history Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution NonCommercial NoDerivatives CC BY NC ND 4.0 International license
