the core of many research programs across a wide array of theoretical paradigms The study of heritage language bilingualism has grown exponentially over the past two decades This expansion in interest has seen in parallel extensions in methodologies applied bridges built between closely related fields such as the study of language contact and linguistic attrition As is typical in linguistics not all languages are studied to the same degree The present volume showcases what Turkish as a heritage language brings to bear for key questions in the study of heritage language bilingualism and beyond In many ways Turkish is an ideal language to be studied because of its large diaspora across the world in particular Europe The papers in this volume are diverse from psycholinguistic to ethnographic to classroom based studies featuring Turkish as a heritage language Together they equal more than their subparts leading to the conclusion that understudied heritage languages like Turkish provide missing pieces to the puzzle of understanding the variables that give rise to the continuum of outcomes characteristic of heritage language speakers
