

Waves Interference Remote Lab 2 Interference

(This lesson is designed for a student working remotely.)

This lab uses the [Waves Interference](https://phet.colorado.edu/sims/html/waves-interference/latest/waves-interference_en.html) simulation from PhET Interactive Simulations at University of Colorado Boulder, under the CC-BY 4.0 license.

https://phet.colorado.edu/sims/html/waves-interference/latest/waves-interference_en.html

Note about prior learning: Students should have completed [Waves on a String Remote Lab](#) and [Waves Interference Remote Lab 1](#) (or [Waves Intro Remote Lab](#)) or lessons with similar learning goals.

Learning Goals: Students will be able to:

- Create an interference pattern with two sources, and determine the ways to change the pattern.
- Find points of constructive and destructive interference by eye and by using the detectors.
- Put up a barrier to see how the waves move through one or two slits. What sort of pattern do the slits create? How can you change this pattern?

Develop your understanding: Open the [Interference](#) screen, then explore to make water waves with varying patterns.

Explain your understanding:

- Consider these three patterns of water waves:

A

B

C

- Describe the similarities and differences of the three patterns of water waves.
 - The wave patterns between pictures A and B are similar because they both have interference patterns which shows there are multiple sources. Picture C's wave patterns does not show any wave interference. A and C also share the similarity of frequencies and this is shown from the crests and troughs of the wave. C and B do not have any other similarities other than the amplitude of the waves.
- Experiment to make similar patterns, then explain how you can use the simulation to make each.

Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions, providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition, with most chapters being completely rewritten, expanded, and updated. Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research, including major findings and methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross-disciplinary by design, and great effort was taken to invite authors outside of the traditional instructional design and technology community.

Physics Peter Lindenfeld, Suzanne White Brahmia, 2011-03-02 Today's physics textbooks have become encyclopedic, offering students dry discussions, rote formulas, and exercises with little relation to the real world. **Physics: The First Science** takes a different approach by offering uniquely accessible, student-friendly explanations, historical and philosophical perspectives, and mathematics in an easy-to-comprehend dialogue. It emphasizes the unity of physics and its place as the basis for all science. Examples and worked solutions are scattered throughout the narrative to help increase understanding. Students are tested and challenged at the end of each chapter with questions ranging from a guided review designed to mirror the examples to problems, reasoning skill building exercises that encourage students to analyze unfamiliar situations, and interactive simulations developed at the University of Colorado. With their experience instructing both students and teachers of physics for decades, Peter Lindenfeld and Suzanne White Brahmia have developed an algebra-based physics book with features to help readers see the physics in their lives. Students will welcome the engaging style, condensed format, and economical price.
